2. Other conditions shall be stipulated in the “Agreement for Allotment of Share Acquisition Rights” entered into between the Company and the share acquisition rights holders.

(2) Overview of share acquisition rights, etc. delivered as compensation for execution of duties of the Company Executive Officers, etc. during current fiscal year

None.

(3) Other important matters related to share acquisition rights, etc.

None.

Matters concerning the Company's officers

Overview of limited liability agreements

The Company has entered into limited liability agreements with non-Executive Directors, namely Takahiro Yanai, Yuri Sasaki, Kayoko Kawamura, Shota Kondo, Yoshitaka Shiba, Hiroyasu Nakata, Hiroko Kaneko, and Masayuki Saito, as described below.

- In the event that a non-Executive Director is liable to the Company as a result of negligence in their duties, that liability shall be limited to the minimum liability set forth in Article 425, Paragraph 1 of the Companies Act.
- The above limitation is recognized only when the non-Executive Director performed the duty in question in good faith and without gross negligence.

Matters concerning directors and officers liability insurance agreement

The Company plans to enter into a directors and officers liability insurance agreement as provided for in Article 430, Paragraph 3, Item 1 of the Companies Act with an insurance company. The agreement will cover losses incurred from damages compensation, legal fees, etc. in cases where an insured receives a claim for damages from a shareholder or third party. In addition, as a measure to ensure that the lawfulness of the execution of duties of the insured person is not compromised, the following losses, etc. are excluded from coverage.

- 1) Damage arising from the fact that the insured illegally obtains private gain or benefit
- 2) Damage arising from criminal acts of the insured
- 3) Damage arising from the insured's acts committed with the knowledge that they violate laws or regulations

The insureds under this agreement are the Directors, Directors who are Audit & Supervisory Committee Members, Audit & Supervisory Board Members, and Executive Officers, etc. of the Company and its subsidiaries in Japan. There is no insurance premium to be paid by the insureds.

Matters concerning Outside Directors

- 1) Concurrent positions of executive Directors, etc. at other corporations, etc. and the Company's relationships to those corporations, etc.

Category	Name	Other corporation	Concurrent position	Relationship to the other corporation, etc.
Director	Shota Kondo	Mitsubishi Corporation	Executive Vice President	There is a trade relationship such as lease agreements between the Company and Mitsubishi Corporation. Mitsubishi Corporation is a major shareholder of the Company.

- 2) Concurrent positions of Outside Officers at other corporations, etc. and the Company's relationships to those other corporations, etc.

Category	Name	Other corporation	Concurrent position	Relationship to the other corporation, etc.
Director	Yuri Sasaki	Meiji Yasuda Life Insurance Company	Outside Director	There is a trade relationship such as lease agreements between the Company and Meiji Yasuda Life Insurance Company. Also, Meiji Yasuda Life Insurance Company is a shareholder of the Company holding 1.94% of its shares.
Director	Kayoko Kawamura	Rakuten Bank, Ltd.	Outside Director	There is no significant trade or other relationship between the Company and Rakuten Bank, Ltd.
Director	Shota Kondo	OK Corporation	Outside Director	There is no significant trade or other relationship between the Company and OK Corporation.

In so doing, he contributes to proper decision-making by the Board of Directors, etc. and supervision of management in general. He also conducts audits from a neutral and objective standpoint, thereby contributing to ensuring the soundness of the Company's management.
Director (Audit & Supervisory Committee Member)	Hiroko Kaneko	Board of Directors meetings: 15/15 Audit & Supervisory Committee : 14/14 Governance Committee : 8/8 Nomination Committee : 9/9 Compensation Committee : 8/8	Leveraging her experience at a major audit firm and as a university professor, as well as her advanced expertise as an accounting professional, Hiroko Kaneko provides comments as necessary and appropriate when proposals are discussed. In so doing, she contributes to proper decision-making by the Board of Directors, etc. and supervision of management in general. She also conducts audits from a neutral and objective standpoint, thereby contributing to ensuring the soundness of the Company's management.

Category	Name	Attendance at meetings	Main activities
Director (Audit & Supervisory Committee Member)	Masayuki Saito	Board of Directors meetings: 15/15 Audit & Supervisory Committee : 14/14 Governance Committee : 8/8 Nomination Committee : 9/9 Compensation Committee : 8/8	Leveraging his extensive management experience at a leading Japanese manufacturer and his insight into finance and accounting operations, Masayuki Saito provides comments as necessary and appropriate when proposals are discussed. In so doing, he contributes to proper decision-making by the Board of Directors, etc. and supervision of management in general. He also conducts audits from a neutral and objective standpoint, thereby contributing to ensuring the soundness of the Company's management.

Status of the accounting auditor

(1) Name of Accounting Auditor of the Company

Deloitte Touche Tohmatsu LLC

(2) Remuneration, etc. for Accounting Auditor in current fiscal year

(i) Remuneration, etc. for Accounting Auditor in current fiscal year of the Company	¥265 million
(ii) Total amount of cash and other property benefits to be paid to the Accounting Auditor by the Company and its consolidated subsidiaries	¥517 million

A total of 14 of the important subsidiaries of the Company receive auditing (limited to the provisions of the Companies Act or the Financial Instruments and Exchange Act, including equivalent laws and regulations in foreign countries) from the certified public accountants or auditing firms (including persons with equivalent certifications in foreign countries) besides the Accounting Auditor of the Company.

(3) Reason that Audit & Supervisory Committee agreed to remuneration for Accounting Auditor

The Audit & Supervisory Committee received a report from relevant internal departments regarding the audit plan's policies and content, which form the basis for the Accounting Auditor's remuneration, as well as the rationale for the cost estimate (number of audit days and personnel). After reviewing the report, the Committee determined that all of these factors were appropriate for conducting the Company's financial audit and therefore approved the amount of the Accounting Auditor's remuneration.

(4) Compensated non-auditing services by the Accounting Auditor to the Company

The Company entrusted the Accounting Auditor with the preparation of comfort letters and other services, which are services other than those stipulated in Article 2, paragraph (1) of the Certified Public Accountants Act (non-auditing services), and paid compensation thereto.

(5) Policies on decisions of dismissal or non-reappointment of Accounting Auditor

If the Accounting Auditor falls under the conditions prescribed in each item of Article 340, paragraph (1) of the Companies Act, the Audit & Supervisory Committee shall dismiss the Accounting Auditor with the agreement of all members of the Audit & Supervisory Committee.

In addition, if the Audit & Supervisory Committee determines that the Accounting Auditor should be changed after comprehensively evaluating the qualifications, expertise, and independence from the Company of the Accounting Auditor, such as in cases of obstacles hindering their ability to execute the duties of Accounting Auditor, the Audit & Supervisory Committee shall decide the details of the proposal relating to dismissal or non-reappointment of the Accounting Auditor that will be submitted to the General Meeting of Shareholders.

System for ensuring appropriate business operation and overview of its operating status

At the meeting of the Board of Directors, the Company has resolved to use a system for ensuring the propriety of business activities of the company (internal control system), in accordance with Article 399-13, paragraph (1), item (i), (b) and (c) of the Companies Act, as well as relevant laws and regulations. The internal control system shall be applied to each Group company by making appropriate adjustments based on factors such as the business operations, scale, and importance of each Group company.

The internal control system for FY2025 is as follows. Hereinafter, “the Group” refers to the Company and the Company’s subsidiaries and affiliates, and “Group companies” refers to the Company’s subsidiaries and affiliates.

System for Group Management

- (1) The Company shall establish the Mitsubishi HC Capital Group Code of Ethics and Code of Conduct in order to share fundamental values and ethics to be embraced by all members of the Group and reflect them in business.
- (2) The Company shall establish management manner between the Company and the Group companies, in order to ensure the propriety of the business activities of the Group companies, and establish internal rules to improve the management efficiency and corporate value of the Group as a whole, through the Group carrying out activities with a strong sense of unity.
- (3) The Company shall require the Group companies to request prior approval or consultation or to provide reports regarding important management matters in line with internal rules in order to manage the Group appropriately. Thus, the Company shall manage the Group companies with responsible departments giving approval, implementing consultation, receiving reports, etc. in adherence to the allocation of duties.
- (4) The Company shall establish management and operational manners for internal controls pertaining to the financial reports of the Group, and shall effectively develop and operate the internal controls of the Group as a whole, so that the Company’s financial reports will be prepared appropriately, in accordance with the provisions of the Financial Instruments and Exchange Act.

Risk Management System

<Company-wide Risk Management>

- (1) The Company shall establish a company-wide risk management system that is based on the policy of taking risks within the controlled scope decided by the Executive Committee, the Board of Directors, and other arms through overall understanding of the wide-ranging risks of the Group and sufficient consideration of potential risks estimated along with new operations. The company-wide risk management system aims to ensure sound management and contribute to sustainable improvement of corporate value, while performing its social responsibility as a company to stakeholders including clients, shareholders, employees and communities.
- (2) The Company shall establish a base for the stable recording of returns corresponding to risk, achievement of an appropriate capital structure, and appropriate allocation of resources, by identifying and recognizing, evaluating and measuring, controlling, monitoring, and reporting the risks of the Group as well as conducting integrated risk management and ongoing operations.
- (3) The Company shall classify the major risks of the Group as follows according to the characteristics of its businesses, operations, etc., and establish risk management manners, operations, and the like.
 - i) Credit risks

- ii) Asset risks
 - iii) Investment risks
 - iv) Market risks
 - v) Liquidity risks
 - vi) Country risks
 - vii) Operational risks
- (4) Group companies shall understand the Group's overall risks that can be reasonably evaluated and measured quantitatively. The Company shall discuss risk capital management as necessary and on a regular basis and take actions for its implementation, monitoring, etc.
 - (5) The Company shall establish internal rules that state, among other matters, the Group's basic policies for risk management and risk management frameworks and operations. The Group companies shall also prepare internal rules that state, among other matters, the risk management frameworks and operations.
 - (6) The Company shall establish an Executive Officer and a department in charge of company-wide risk management, respectively, and hold Risk Management Committee meetings related to the integrated risk management of the Group as necessary and on a regular basis. Reports to the Risk Management Committee shall be made on major risks of the Group's business, and other risk management-related matters concerning financial markets, liquidity, compliance, systems, IT, etc. provided from the committees and internal audits.
 - (7) The Company shall request the Group companies to report important risk-related matters and compile information that is necessary for company-wide risk management. Then, reports shall be made to the Board of Directors on the current situation, issues and measures to be taken as necessary, etc. related to the overall management of the Group, and the Board of Directors shall supervise integrated risk management and operations.

<Crisis Management>

- (1) The Company shall clarify the Group's basic approach to and criteria for responding to crisis events and sharing them with the Group companies in order to prepare for situations such as huge financial losses, loss of credibility, and excessive delay or prolonged suspension of business at the Group. Also, the Company shall establish the systems necessary to ensure the continuation of overall business operations and restoration of normal functions, perform its social responsibility, and minimize the Group's losses.
- (2) The Company shall, during normal times, designate departments to respond to potential emergency events according to its nature and establish a response system according to risk stage. The Company shall establish internal rules that are necessary in an emergency for information collection, internal collaboration, and implementation of measures for business continuation and recovery. The Group companies shall establish their own internal regulations, etc.

Compliance System

- (1) The Company shall establish the Mitsubishi HC Capital Group Code of Ethics and Code of Conduct in order to share fundamental values and ethics to be embraced by all members of the Group and reflect them in business.
- (2) The Company shall establish a system for ensuring that the officers and employees of the Group comply with laws and regulations and the Articles of Incorporation, by establishing and announcing internal rules and the Compliance Manual.

- (3) The Company shall establish the Compliance Committee, which deals with establishment, maintenance, management, etc., of the Group's compliance system, in addition to the Chief Compliance Officer (Head of Risk Management Division), who is responsible for the compliance of the Group, and the Legal & Compliance Department, which is tasked with enforcing compliance.
The Group companies shall, if there are any legal risks, etc. inherent to the business activities of such company, cooperate with the Company as necessary, and develop an appropriate compliance system.
- (4) The Company shall formulate compliance programs (specific plans to ensure that the officers and employees of the Group comply with laws and regulations, etc., including education for the Group's officers and employees) and monitor how the Group's officers and employees are working on those programs.
- (5) The Company shall establish the Compliance Hotline System as an internal whistleblowing system under which the Group's officers, employees, etc., can report to or seek consultations with the Company regarding unfair practices and other conduct. The Company shall not treat disadvantageously persons who have made reports merely because they made those reports using an internal whistleblowing system. The Company shall clarify this in its internal rules, etc. and fully inform all officers and employees through internal training and on other occasions.
- (6) The Group shall take a resolute stance against anti-social forces, which threaten the peace and stability of civil society, and work to prevent transactions with such forces.
- (7) The Company shall be aware of the possibility that funds transacted through the Group may be used for various criminal activities and/or terrorism, and shall work to prevent money laundering.

Information Management System

- (1) The Company shall appropriately handle information assets held by the Group, and establish and manage necessary systems, etc. for the maintenance and enhancement of information security.
- (2) The Company shall establish management measures required for the protection of information held by the Company and internal regulations, etc. that stipulate the method and term of storing documents, etc. and matters related to the response to information security incidents, etc. The Group companies shall establish and manage their own internal regulations, etc. within each company.

Information Disclosure System

- (1) The Group shall establish internal rules for appropriately disclosing information regarding decisions and occurrences concerning the Group in a timely manner, in accordance with accounting standards and other relevant laws and regulations. The Group companies shall cooperate with the Company as necessary.
- (2) The Company shall establish a Disclosure Committee for deliberating on the appropriateness of information disclosures regarding the Group and the effectiveness of internal controls and procedures related to information disclosures, among other matters.

Internal Audit System

- (1) The Company shall establish internal rules to smoothly and effectively promote audit activities by clarifying procedures for planning, implementing, and reporting internal audits and providing instructions for improvement within the Group.
- (2) The Company shall establish the Internal Audit Department as a department in charge of internal audits. The Internal Audit Department shall systematically implement internal audits related to the Group based

on an annual audit plan and report the audit results to the Representative Directors, Board of Directors, and Audit & Supervisory Committee. With regard to findings that require improvement, for which guidance was provided to the departments subject to audits (important findings), those departments, after taking improvement measures, are made to report the results to the General Manager of the Internal Audit Department. The results for important findings are to be reported by the Internal Audit Department to the Representative Directors, in order to ensure the effectiveness of the audit.

- (3) The General Manager of the Internal Audit Department of the Company shall build collaborative relationships with the Company's Audit & Supervisory Committee, and the auditors, accounting auditors, etc. of the Group companies on a regular basis and as necessary, such as by exchanging relevant information with them, and shall work to ensure the efficient implementation of the audit.

Framework for Ensuring the Efficient Execution of Duties

- (1) The Company shall set management targets for the Group and draw up management plans to manage business based on appropriate manners. The Group companies shall conduct business management based on appropriate manners, based on the Group's management targets and management plans.
- (2) The Company shall establish the Executive Committee, a body which will deliberate and decide on important matters, and the Board of Directors shall delegate the business execution decisions to the Executive Committee in an appropriate manner. The Executive Committee will hold discussions and make decisions on important matters, including the business management of the Group, in addition to conducting preliminary deliberations of matters that are to be submitted to the Board of Directors to facilitate decision-making by the Board of Directors. In addition, various committees shall be established as advisory bodies to the Executive Committee.
- (3) In order to efficiently conduct the execution of duties based on the decisions of the Board of Directors, the Company shall build an organizational structure, etc., in accordance with the internal rules, and shall assign the execution of duties. The Group companies shall provide appropriate cooperation such as reports to and consultations with the Company on necessary matters pursuant to the internal rules.

Other Matters Related to the Execution of Duties by Directors

(Framework for ensuring that the execution of duties by Directors complies with laws, regulations, and the Articles of Incorporation, framework for retention and management of information, and framework for reports to the Company of matters related to the execution of duties by subsidiaries' Directors)

- (1) The Company shall establish the Executive Committee to deliberate and decide on important management matters. The Audit & Supervisory Committee Members selected by the Audit & Supervisory Committee shall attend the meeting and confirm the details of the deliberation.
- (2) The Company shall clearly define the authority and responsibilities of the Board of Directors and Directors regarding material decision-making matters including compliance management, as well as matters decided at the discretion of the Board of Directors.
- (3) Board of Directors shall receive and confirm reports of material information related to the execution of duties by Executive Directors, and utilize an internal whistleblowing system through reports made at the Compliance Committee, etc.
- (4) The Company shall retain and manage material documents and other data related to the execution of duties by Directors pursuant to the provisions of the internal rules.

- (5) The Company shall request application for prior approval or consultation, provision of reports, etc. regarding matters related to the execution of duties by directors of the Group companies pursuant to the provisions of the internal rules.

Framework Concerning Employees Who Assist with Duties of the Audit & Supervisory Committee

- (1) The Company shall establish an Audit & Supervisory Committee Office to assist with duties of the Audit & Supervisory Committee.
- (2) The Company shall allocate employees to assist with duties of the Audit & Supervisory Committee to the Audit & Supervisory Committee Office.
- (3) The above employees shall not be subject to the directions and instructions of Directors excluding Directors who are Audit & Supervisory Committee Members.
- (4) When implementing personnel transfers or disciplinary action for the above employees, the consent of the Audit & Supervisory Committee shall be obtained. When determining performance evaluation, remuneration, etc. for those employees, the consent of the Audit & Supervisory Committee Members selected by the Audit & Supervisory Committee shall be obtained.
- (5) Executive Directors shall cooperate in developing working environments and other relevant conditions so that the above employees can assist with duties of the Audit & Supervisory Committee smoothly.

Framework for Reporting to the Audit & Supervisory Committee

- (1) Directors, Executive Officers and other relevant executives, and employees must report the following matters without delay to the Audit & Supervisory Committee or the Audit & Supervisory Committee Members selected by the Audit & Supervisory Committee:
 1. when they discover any facts that are likely to cause significant damage (including loss of credit) to the Company or when significant damage occurs, they shall immediately report to that effect (including matters concerning material lawsuits);
 2. the status of whistleblowing through an internal whistleblowing system developed by Directors;
 3. the status of management concerning elimination of transactions, and blocking of relationships, with anti-social forces; and
 4. other matters that the Audit & Supervisory Committee requests to be reported.
- (2) Directors, auditors, and employees of subsidiaries or persons who receive reports from any of those persons must report to the Audit & Supervisory Committee or the Audit & Supervisory Committee Members selected by the Audit & Supervisory Committee without delay, if any of the matters set forth in the preceding paragraph occurs.
- (3) Audit & Supervisory Committee Members selected by the Audit & Supervisory Committee shall cooperate closely with the auditors of Group companies and other relevant persons, through right means such as exchanging information necessary for the execution of duties.
- (4) If required by the Audit & Supervisory Committee, Directors, Executive Officers and other relevant executives and employees must attend the Audit & Supervisory Committee meeting and explain matters with necessary materials. In addition, they have a similar duty to explain if required by the Audit & Supervisory Committee Members selected by the Audit & Supervisory Committee.
- (5) The Company shall not treat the persons who have made the reports under (1) to the Audit & Supervisory Committee or any Audit & Supervisory Committee Members disadvantageously, just because they made those reports.

Matters concerning Policies regarding the Expenses or Liabilities Arising from the Execution of Duties by the Audit & Supervisory Committee Members

- (1) The Audit & Supervisory Committee Office shall promptly process expenses or liabilities when each Audit & Supervisory Committee Member makes requests with respect to the prepayment of expenses and other payments, except in cases where such requested expenses or liabilities are deemed to be clearly unnecessary for the execution of the duties of an Audit & Supervisory Committee Member.

Other Frameworks for Ensuring Effective Audits by the Company's Audit & Supervisory Committee Members

- (1) The Audit & Supervisory Committee should create an opportunity to conduct interviews regularly with Directors, Executive Officers, and employees concerning the business, and regularly exchange opinions with each of them.
- (2) The Audit & Supervisory Committee may request opinions from lawyers, the Accounting Auditor, etc. as necessary, for cases that require expertise.
- (3) The Audit & Supervisory Committee shall enhance the effectiveness of audits by receiving an audit plan and an audit implementation report from the Accounting Auditor and regularly exchanging opinions with them, as well as collecting information and improving the audit environment in collaboration with the Internal Audit Department and other departments responsible for internal control.
- (4) An employee who is selected by the Audit & Supervisory Committee to assist the duties of an Audit & Supervisory Committee Member and the duties of the Audit & Supervisory Committee may attend the Executive Committee, committees and other important meetings and make necessary statements at such places, and view important documents.
- (5) An Audit & Supervisory Committee Member selected by the Audit & Supervisory Committee should request that the Company and its subsidiaries report on its business, or investigate the situation of the duties and properties, and the Company and its subsidiaries should cooperate with this.
- (6) The Internal Audit Department should make a report to the Audit & Supervisory Committee regarding the internal audit plan, internal audit result, and the amendment and abolition of the important rules related to internal audit, and should respond to requests by the Audit & Supervisory Committee in relation to information provision, investigation, and report.
- (7) Directors, Executive Officers, and employees should provide the necessary cooperation for the execution of duties of the Audit & Supervisory Committee, based on the Audit & Supervisory Committee Regulations, standards for audit, etc. of the Audit & Supervisory Committee, and standards for the Audit & Supervisory Committee to conduct an audit regarding an internal control system.

(Overview of the operating status of the system for ensuring appropriate business operation)

An overview of the operating status for the 55th fiscal year (fiscal year ended March 31, 2026) of the system for ensuring appropriate business operation (internal control system) is as follows.

System for Group Management

- (1) The Company has established and disclosed the Our Mission that embraces the goals of the Group, and the Our Vision that leads to realizing the Our Mission. The Company has established and disclosed the Mitsubishi HC Capital Group Code of Ethics and Code of Conduct in order to share fundamental values and ethics to be embraced by all members of the Group and reflect them in business.

- (2) The Company has established six Sub-Committees (risk management, information disclosure, compliance, ALM, sustainability, and IT) as consultative bodies under the Executive Committee, and each of the Sub-Committees examine and report controlling matters (including matters of the Group companies) to the Executive Committee and, significant matters to the Board of Directors. In addition, the Company has established internal rules for the management of the Group companies and assigned an organization responsible for the internal rules. The Company receives timely reports from this organization and provides necessary advice and instruction.
- (3) The Company has documented the content of internal controls related to financial reports of the Group based on the internal rules and evaluated such reports for effectiveness through periodical verifications.

Risk Management System

<Company-wide Risk Management>

- (1) The Company has established internal rules that stipulate matters concerning the Group's basic policies for risk management, risk management methods, operations, the system, etc. and familiarized such matters in the Group.
- (2) The Company has established the Risk Management Department that integrates the Group's risk management. The Risk Management Department has comprehensively grasped the Group's risks, monitored its risk management operation statuses, worked as the administrative office for the Risk Management Committee (holding two meetings in the current business year), which is a consultative body to the Executive Committee, and reported integrated risks and individual risk statuses to the Executive Committee and the Board of Directors.

<Crisis Management>

- (1) The Company has installed the Chief Crisis Management Officer (CCMO) who is responsible for supervising the entire Group in building and operating the crisis management system. In addition, the Company has specified crisis events subject to crisis management, established internal rules that clarify basic thoughts, judging standards, and handlings of different levels of crises, familiarized those matters in the Group, and developed a system that receives reports from the Group, to perform crisis management in a Group-wide manner. Moreover, the Company has shaped the position of the countermeasure headquarters that deals with crisis events, periodically held disaster control trainings, and worked for enhancing effectiveness of the trainings by resolving problems identified through such trainings.

Compliance System

- (1) The Company has established and disclosed the "Mitsubishi HC Capital Group Code of Ethics and Code of Conduct." In addition, the Company has established different types of internal rules and the Compliance Manuals and made them known well to the Group.
- (2) The Company has assigned the Chief Compliance Officer (Head of Risk Management Division) as Supervisor and installed the Legal & Compliance Department that will build compliance promotion systems for the Group. The Legal & Compliance Department has formulated compliance programs to work for compliance promotion through monitoring and holding training programs and served as the administrative office to the Compliance Committee (that opened four meetings in the current business year), which is a consultative body under the Executive Committee, and reported legal compliance matters to the Executive Committee and the Board of Directors.

- (3) The Company has established both the Compliance Hotline System as an internal whistleblowing system under which the Group’s executives, employees, etc., can report to or seek consultations with the Company regarding unfair practices, etc., and the Harassment Helpline System as an internal whistleblowing system to report or seek consultations regarding harassment, etc., and has periodically made the systems known well to officers, etc. and firmly protects reporting or consulting persons from disadvantageous treatment.
- (4) The Company has formulated treatment rules and accordingly established internal rules and manuals of how to prevent deals with anti-social forces as well as money-laundering and proliferation financing and make officers and employees familiar with those rules and manuals by providing internal education, etc.

Information Management System

- (1) The Group has been working to establish effective information security management systems and policies to protect all of its information assets from various security threats. Under the leadership of our Chief Information Security Officer (CISO), the Company has established a cross-functional team called the “MHC-SIRT (Security Incident Response Team),” which prevents cyberattacks and other threats, conducts regular internal training and drills, and examines response measures and investigates the causes of incidents when they occur. In addition, the Company has appointed information security managers and staff at each department and office to establish a comprehensive information security management framework across the entire organization.

Information Disclosure System

- (1) The Company has established and disclosed the “Information Disclosure Policy” as the basic policy of the Group’s information disclosure. In addition, the Company has formulated internal rules to make timely and appropriate disclosure and developed a system to receive timely report from the Group. The information disclosure of the Group is reported to the Executive Committee after its appropriateness and procedural effectiveness is examined at the Information Disclosure Sub-Committee (which held four meetings in the current business year).

Internal Audit System

- (1) The Company has enacted internal rules to clarify procedures related to planning, implementing, and reporting internal audits and providing instructions for improvement within the Group and familiarized these internal rules in the Group.
- (2) The Company has established the Internal Audit Department as the department in charge of internal audits. The Internal Audit Department has formulated annual audit plans, systematically implemented internal audits related to the Group, and reported the audit results to the Representative Director, Board of Directors and Audit & Supervisory Committee. In addition, results of improvement for matters requiring improvement where findings have been made and guidance given in audits (matters requiring improvement) have been reported to the General Manager of the Internal Audit Department and audit effectiveness has been ensured through PDCA.
- (3) The General Manager of the Internal Audit Department has regularly and appropriately exchanged relevant information with the Audit & Supervisory Committee Members of the Company, Auditors and other relevant persons, and the Accounting Auditor of the Group companies, and worked for efficient implementation of audits.

Framework for Ensuring the Efficient Execution of Duties

- (1) The Company has established a smooth decision-making system by delegating President to decide execution of significant operations subject to deliberation at the Board of Directors' and the Executive Committee's examinations.
- (2) The Company holds, in principle, an Executive Committee meeting every two weeks, and examines agendas scheduled to be examined at Board of Directors' meetings that are useful to the Board of Directors' decision-makings, besides consulting and deciding on significant matters including the Group's business management. Furthermore, the Company has established different types of sub-committees as consultative bodies under the Executive Committee, and introduced a system that enables to report significant agendas, among those examined at such sub-committees, to the Executive Committee and the Board of Directors, in order to execute appropriate business management.
- (3) The Company has established internal rules that stipulate an employee rank framework, organizational structure, and allocation of business operations to perform efficient executions of duties, and performed such execution of duties based on the allocation of business operations.

Other Matters Related to the Execution of Duties by Directors

(Framework for ensuring that the execution of duties by Directors complies with laws, regulations, and the Articles of Incorporation, framework for retention and management of information, and framework for reports to the Company of matters related to the execution of duties by subsidiaries' Directors)

- (1) The Audit & Supervisory Committee Members that are elected by the Audit & Supervisory Committee have attended important meetings of the Executive Committee, etc. to confirm what are deliberated at such meetings.
- (2) The Company has clarified the powers and responsibilities of the Board of Directors and Directors in the internal rules and disseminated them in the Group, and the Board of Directors has received reports on significant information related to the execution of duties in the Group.
- (3) The Company shall retain and manage material documents and other data related to the execution of duties by Directors pursuant to the provisions of the internal rules.

Framework concerning Employees Who Assist with Duties of the Audit & Supervisory Committee

- (1) The Company has installed the Audit & Supervisory Committee as the organization that effectively performs the duties of the Committee and assigned dedicated employees. Personnel affairs, etc. of such dedicated employees are subject to consent by the Audit & Supervisory Committee, reflecting the independence of the Audit & Supervisory Committee.

Framework for Reporting to the Audit & Supervisory Committee

- (1) The Company has stipulated in its internal control system the significant matters that shall be reported to the Audit & Supervisory Committee or to its members elected by the Audit & Supervisory Committee and familiarized said matters within the Group. Situations of finance, risk management and internal audits in the Group, and situations of compliance including the operation of the internal whistleblowing system are reported to the Audit & Supervisory Committee.
- (2) The scheme of the internal whistleblowing system is made periodically familiarized to officers, etc. and reporting persons are firmly protected from disadvantageous treatment. In addition, the Company has stipulated that the Audit & Supervisory Committee Members designated by the Committee are one of the internal whistleblowing system windows.

- (3) For efficient auditing, the Audit & Supervisory Committee Members who are elected by the Audit & Supervisory Committee periodically exchange information necessary for the execution of their duties with the departments concerning internal control of the Company (Risk Management Department, Legal & Compliance Department, Treasury Department, Accounting Department, etc.) and Audit & Supervisory Board Members, etc. of the Group companies.

Matters concerning Policies regarding the Expenses or Liabilities Arising from the Execution of Duties by the Audit & Supervisory Committee Members

- (1) The Company has stipulated in the audit standards of the Audit & Supervisory Committee that Audit & Supervisory Committee Members may demand from the Company the expenses and/or liabilities arising during execution of their duties and the Company has paid accordingly.

Other Frameworks for Ensuring Effective Audits by the Company's Audit & Supervisory Committee Members

- (1) The Audit & Supervisory Committee periodically exchanges opinions with the President, the Audit Department, the department in charge of internal control functions, and the Accounting Auditor, respectively. In addition to receiving audit plans and the results of audits from the Internal Audit Department and the Accounting Auditor, the Committee has worked to improve the effectiveness of audits by collaborating with the department in charge of internal control functions to collect information from, including investigations into, offices and subsidiaries, etc.
- (2) The Audit & Supervisory Committee Members that are elected by the Audit & Supervisory Committee have attended significant meetings including the Executive Committee, etc. to make necessary remarks and view important documents.
- (3) The audit standards of the Audit & Supervisory Committee have a stipulation that when the Audit & Supervisory Committee receives advice from outside experts including lawyers, it may demand the expense from the Company.

(Reference) The Company revised a portion of its systems for ensuring appropriate business operation on April 1, 2026. The main revisions are as follows.

- i) Added an entry regarding the establishment of the "Harassment Helpline System" as an internal whistleblower system for all types of harassment.
- ii) Added an entry regarding individuals subject to economic sanctions and measures to prevent the provision of funds for the acquisition of materials related to weapons of mass destruction, in light of recent security developments and the situation regarding Russia-Ukraine and U.S.-China relations.

Consolidated statement of changes in equity

(April 1, 2025 to March 31, 2026)

(Millions of yen)

	Shareholders' equity				
	Share capital	Capital surplus	Retained earnings	Treasury shares	Total shareholders' equity
Balance at beginning of period as of April 1, 2025	33,196	545,973	854,270	(20,128)	1,413,312

Notes on consolidated financial statements

<Notes to basis of preparing consolidated financial statements>

1. Matters related to scope of consolidation

(1) Number of consolidated subsidiaries: 269

The names of the major consolidated subsidiaries are listed in “Status of major subsidiaries” of the Business Report.

The following companies were included in the scope of consolidation from the current fiscal year: MHC Incubation Center, Inc. and four other companies due to their establishment; and Sanfukuden Tokutei Mokuteki Kaisha and 26 other companies due to the acquisition of equity, etc.

The following companies were excluded from the scope of equity method application but included in the scope of consolidation during the current fiscal year: Hokkaido Yakumo Solar Park G.K. and two other companies due to the additional acquisition of equity, etc.

The following companies were excluded from the scope of consolidation during the current fiscal year: FP Shipping S.A. and 14 other companies due to the completion of liquidation, etc.

(2) Names of major non-consolidated subsidiaries

There are no major non-consolidated subsidiaries which should be disclosed.

Reason for exclusion from scope of consolidation

Of the non-consolidated subsidiaries, 153 companies are proprietors conducting leasing businesses primarily through silent partnerships. Their assets, liabilities, and gains/losses are not attributable to the pertinent subsidiaries and the Company has barely any transactions with the subsidiaries. Therefore, they are excluded from the scope of consolidation.

Of the non-consolidated subsidiaries, 47 companies are small businesses. Their total assets, revenues, net income or loss (amount corresponding to equity share), retained earnings (amount corresponding to equity share), etc. do not significantly impact the consolidated balance sheet nor consolidated statement of income. Therefore, they are excluded from the scope of consolidation.

2. Matters related to the application of the equity method

(1) Number of non-consolidated subsidiaries applying equity method: 1

There are no major non-consolidated subsidiaries which should be disclosed.

(2) Number of affiliates applying equity method: 67

Names of major equity method affiliates

Mitsubishi Electric Financial Solutions Corporation

Chubu Electric Power & MHC Germany Transmission GmbH

European Energy A/S

Mitsubishi Auto Leasing Corporation

The following companies are included in the scope of equity method application from the current fiscal year: Geostationary Meteorological Satellite System Services Corporation and six other companies due to the acquisition of shares, etc.

The following company was excluded from the scope of equity method application during the current fiscal year: Rainbow Connection 2 Pte. Ltd. due to the sale of its shares

The following companies were excluded from the scope of equity method application but included in the scope of consolidation during the current fiscal year: Hokkaido Yakumo Solar Park G.K. and two other companies due to the additional acquisition of equity, etc.

- (3) Names of major companies, etc. among non-consolidated subsidiaries or affiliates not applying equity method

There are no major non-consolidated subsidiaries or affiliates which should be disclosed.

Reasons not to apply equity method

Of the non-consolidated subsidiaries, 153 companies are proprietors conducting leasing businesses primarily through silent partnerships. Their gains/losses are not attributable to the pertinent subsidiaries and the Company has barely any transactions with the subsidiaries. Therefore, they are excluded from the scope of equity method application.

Of the non-consolidated subsidiaries and the affiliates, 46 non-consolidated subsidiaries and 20 affiliates have insignificant impact on the consolidated balance sheet and consolidated statement of income from a perspective of net income or loss (amount corresponding to equity share), retained earnings (amount corresponding to equity share), etc., even when excluded from equity method. As they are also not important overall, they are excluded from the scope of equity method application.

3. Matters related to fiscal year of consolidated subsidiaries

- (1) Consolidated subsidiaries with balance sheet dates that differ from consolidated balance sheet date

April 30:	2 companies
May 31:	1 company
June 30:	3 companies
July 31:	1 company
August 31:	1 company
September 30:	2 companies
October 31:	18 companies
November 30:	4 companies
December 31:	72 companies
January 31:	44 companies
February 28:	1 company

- (2) Consolidated subsidiaries with balance sheet dates of the ends of April, July, and October are consolidated in financial statements based on provisional closings conducted as of the end of January.

Consolidated subsidiaries with balance sheet dates of the ends of May, August, and November are consolidated in financial statements based on provisional closings conducted as of the end of February.

Consolidated subsidiaries with balance sheet dates of the ends of June and September are consolidated in financial statements based on provisional closings conducted as of the end of December.

Further, for seven of the consolidated subsidiaries with balance sheet dates of the end of December, provisional closings are calculated based on the results at the consolidated balance sheet date. Other consolidated subsidiaries use the financial statements as of their respective balance sheet dates.

Also, important transactions that occur between the consolidated balance sheet date and the above balance sheet dates are adjusted as needed in consolidation.

- (3) Previously, for Engine Lease Finance Corporation and its eight subsidiaries, CAI International, Inc. and its 15 subsidiaries, and PNW Railcars, LLC* and its two subsidiaries, which are consolidated subsidiaries with a balance sheet date of December 31, the Company used financial statements as of that date for preparing the consolidated financial statements and made necessary consolidation adjustments for material intercompany transactions that occurred between that date and the Company's consolidated balance sheet date. Starting from the fiscal year under review, the fiscal year-end of the consolidated subsidiary was changed to March 31 to align with the Company's consolidated balance sheet date. Accordingly, in preparing the consolidated financial statements for the fiscal year under review, the Company adopted a method of adjusting the profit and loss for the period from January 1, 2025 to March 31, 2025 through the consolidated statement of income. As a result, the consolidation period for the fiscal year under review covers 15 months, from January 1, 2025 to March 31, 2026.

For the period from January 1, 2025 to March 31, 2025, the consolidated subsidiary recorded revenues of ¥67,204 million, operating income of ¥19,316 million, recurring income of ¥19,629 million, income before income taxes of ¥19,629 million, and net income of ¥15,242 million. In addition, during the same period, deferred gains or losses on hedges decreased by ¥3,004 million, and foreign currency translation adjustment decreased by ¥20,559 million.

As a result of this change, net income attributable to owners of the parent in the consolidated statement of income for the fiscal year under review increased by ¥22,820 million.

* PNW Railcars, LLC changed its corporate structure from PNW Railcars, Inc. effective March 31, 2026.

4. Matters related to accounting policies

- (1) Valuation standards and methods for important assets

- 1) Securities

Held-to-maturity debt securities:

Amortized cost method (straight-line method)

Of available-for-sale securities, bonds and other securities held for earning financial revenues for operating purposes (operational investment securities)

- Other than shares that have no market value

Fair value method

(Valuation differences are included directly in net assets and costs of securities sold are determined by the moving average method.)

- Shares with no market value, etc.

Cost method based mainly on the moving average method

For investments in limited liability investment partnerships and similar entities (deemed to be securities based on Article 2, paragraph (2) of the Financial Instruments and Exchange

Act), these are stated by the net amount corresponding to the Company's equity share based on the most recent obtainable financial statements depending on the reporting date established by the partnership agreement.

In addition, investments in partnerships, etc. invested by certain consolidated subsidiaries outside Japan are recorded on the valuation of the market value that each of the invested companies recognized and accordingly the net amounts equivalent to the equity interests are included.

Available-for-sale securities not included above

- Other than shares that have no market value

Fair value method

(Valuation differences are included directly in net assets and costs of securities sold are determined by the moving average method.)

- Shares with no market value, etc.

Cost method based on the moving average method

For investments in limited liability investment partnerships (deemed to be securities based on Article 2, paragraph (2) of the Financial Instruments and Exchange Act), these are stated by the net amount corresponding to the Company's equity share based on the most recent obtainable financial statements depending on the reporting date established by the partnership agreement.

- 2) Derivatives

Fair value method

- 3) Inventories

Cost method based on the specific-cost method

(Consolidated balance sheet values are calculated using the method of writing down the book value based on declining profitability)

- (2) Methods of depreciation and amortization of significant depreciable and amortizable assets

- 1) Leased assets

Depreciation is calculated with the lease period or estimated useful lives of assets considered as the depreciation years, and using the straight-line method based on the standard that the estimated disposal value of a leased asset at the fulfillment of the period to be the residual value.

- 2) Other operating assets

Depreciation is calculated with the estimated useful lives of assets considered as the depreciation years, and using the straight-line method.

- 3) Own-used assets

The Company and domestic consolidated subsidiaries primarily adopt the declining balance method.

However, for buildings (excluding equipment attached to buildings), as well as equipment attached to buildings and structures acquired on or after April 1, 2016, depreciation is primarily calculated using the straight-line method. Consolidated subsidiaries outside Japan primarily adopt the straight-line method.

- 4) Other intangible assets (excluding goodwill)

For software (used internally), amortization is mainly calculated using the straight-line method

based on expected usable period (five to ten years) in the Company.

For other amortizable assets, amortization is calculated using straight-line method based on expected effective period.

(3) Accounting policy for significant allowances and provisions

1) Allowance for doubtful accounts

To reserve for loss on doubtful accounts, estimated uncollectible amounts are booked based on historical default rates for general receivables, or based on individual consideration of collectability for doubtful receivables and distressed receivables (receivables from legally or substantially bankrupt obligors).

Also, the Company applies the “Treatment on the calculation of default estimates” established in “Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Lease Industry” (The Japanese Institute of Certified Public Accountants Industry Committee Practical Guidance No. 19, revised on September 13, 2024).

With respect to the amount of distressed receivables, the amount expected to be recoverable is deducted from the receivable amount, and the remainder, which is treated as the estimated amount of uncollectible receivables, is directly deducted from the receivable amount. This amount is ¥8,347 million.

In addition, the consolidated subsidiaries adopting the International Financial Reporting Standards outside Japan post allowance for doubtful accounts after measuring their projected credit loss for 12 months or the entire expected remaining period using the loss ratio that is adjusted after past bad debt records and current and future economic situations, etc. are counted. In addition, the consolidated subsidiaries adopting U.S. accounting standards outside Japan post allowance for doubtful accounts after measuring their projected credit loss for the entire expected remaining period using the loss ratio that is adjusted after past bad debt records and current and future economic situations, etc. are counted.

2) Provision for bonuses

The Company and certain consolidated subsidiaries book the amount expected to be paid in the following fiscal year that are attributable to the current fiscal year in order to issue payment for bonuses to employees.

3) Provision for bonuses for directors (and other officers)

The Company and certain consolidated subsidiaries book the amount expected to be paid in the following fiscal year that are attributable to the current fiscal year in order to issue payment for bonuses to officers and executive officers.

4) Provision for retirement benefits for directors (and other officers)

Certain domestic consolidated subsidiaries book the full amount to be paid at the end of the current fiscal year based on the internal payment rules in order to issue payment for retirement benefits of officers and executive officers.

5) Provision for share awards for directors (and other officers)

To provide for the delivery of the Company’s shares for directors and other officers in accordance with the performance-based stock compensation plan, the Company books the amount expected to be paid at the end of this current fiscal year.

6) Provision for compensation losses

We have recorded a provision based on a reasonable estimate to cover loss on compensation that may occur in the future.

For details, please refer to Note 3, "Provision for compensation losses," in the Notes on consolidated statement of income.

(4) Method of accounting for retirement benefits

1) Method of attributing estimated retirement benefits for periods of service

In the calculation of retirement benefit liabilities, the method of attributing the estimated amount of retirement benefits to the period until the end of the current fiscal year is on the benefit formula basis.

2) Amortization of actuarial gains and losses and past service cost

Past service cost is amortized using the straight-line method for the average remaining service years of employees (11 to 15 years) at the time of occurrence.

Actuarial gains and losses are amortized with the pro-rata amount calculated using the straight-line method for a certain number of years (7 to 17 years) within the scope of the average remaining service years of employees when incurred in each fiscal year from the respective following fiscal years.

(5) Accounting standards for important income and expenses

1) Accounting standards of revenues and cost of revenues related to finance lease transactions

The Company books the revenues and cost of revenues corresponding to the elapsed period based on a standard of a monthly lease fee to be received under the lease agreement for the duration of the lease agreement period.

2) Accounting standards of revenues related to operating lease transactions

The Company books lease fees corresponding to the elapsed period based on a standard of a monthly lease fee to be received under the lease agreement for the duration of the lease agreement period.

The Company and consolidated subsidiaries inside Japan book disposal amount and cost related to disposal of leasing assets as revenues and cost of revenues.

3) Accounting policy for revenue from contracts with customers

The Company has recognized revenue at the time the control of promised goods or services is transferred to the customer at the amount expected to be received upon exchange of said goods or services. The description of major performance obligations of major businesses and the times recognizing revenues are stated as follows:

(Sales from maintenance contracts)

Along with concluding lease contracts, maintenance and other services are offered to customers. At the time when service is delivered, the performance obligation is judged as met and revenue is recognized.

(Sales from selling merchandise, sales from disposal of lease properties, etc.)

Sales from selling merchandise and disposal of lease properties on maturities of lease contracts by consolidated subsidiaries outside Japan adopting the International Financial Reporting Standards or the U.S. accounting standards are recognized as revenue when the delivery of said

properties to customers is completed and, therefore, the fulfillment obligation is considered as met.

(Electricity sales)

Electricity sales to customers for the accounting year are calculated and recognized as revenue in accordance with electricity supply volumes to the customers.

- (6) Translation criteria of major assets or liabilities denominated in foreign currencies into Japanese yen
Monetary claims and liabilities denominated in foreign currencies are translated into Japanese yen by using the spot exchange rates on the consolidated balance sheet date, and the difference arising from such translation is stated as gain or loss. Monetary claims and liabilities denominated in foreign currencies subject to allocation treatment, such as forward exchange, etc., are translated into a forward exchange in Japanese yen.

Assets and liabilities of foreign consolidated subsidiaries are translated into Japanese yen by using the spot exchange rates on their respective balance sheet dates. Income and expenses are translated into Japanese yen using the average exchange rates during the period. The difference arising from such translation is included in foreign currency translation adjustment and non-controlling interests in the equity section.

- (7) Important hedge accounting methods

- 1) Hedge accounting methods

The Company applies the deferred hedge method.

The Company applies allocation treatment for forward exchange that meets to requirements of allocation treatment, and the Company applies special treatment for interest rate swaps that meet requirements of special treatment.

- 2) Hedge instruments and hedged items

Hedge instruments... Interest rate swap instruments, foreign currency interest rate swap instruments, forward exchange contracts, investment in equity for overseas consolidated subsidiaries and overseas affiliates, and other liabilities denominated in foreign currencies related to available-for-sale securities denominated in foreign currencies

Hedged items..... Borrowings, bonds payable, commercial papers, current maturities of loans from the securitizations of the minimum future rentals on lease contracts, investment in equity for overseas consolidated subsidiaries and overseas affiliates, and available-for-sale securities denominated in foreign currencies

- 3) Hedge policies and methods to evaluate hedge effectiveness

In order to hedge interest rate and foreign currency rate fluctuation risks, and maintain a stable income, the Company performs derivative transactions based on internal rules.

Regarding interest rate fluctuation risks, lease fee receivables and installment receivables, etc., the primary operating assets of the Company, adopt a long-term fixed interest rate. On the other hand, because there are variable interest rates within the financing through bank borrowings, etc., the Company manages and performs comprehensive hedges so that the expected principal of derivative transactions that are hedging instruments is within the scope of hedged liabilities based on the comprehensive management of assets and liabilities (ALM: Asset Liability

Management). Furthermore, the Company uses interest rate-related derivative transactions for the purpose of locking in profit on individual projects.

Regarding foreign currency exchange rate fluctuation risks, the Company uses currency-related derivative transactions and hedges through liabilities denominated in foreign currencies for individual assets and liabilities denominated in foreign currencies, investment in equity for overseas consolidated subsidiaries and overseas affiliates, and available-for-sale securities denominated in foreign currencies.

The Company evaluates the effectiveness of hedges by verifying whether the interest rate of hedged items and the foreign currency exchange rate fluctuation risk are diminished. However, interest rate swaps performed by special treatment are not included in the evaluation of effectiveness.

Transaction status is reported quarterly to the officer in charge.

For derivative transactions of consolidated subsidiaries, the status of hedge with derivative transactions and applicable claims and liabilities, contract participants, transaction amount, remaining period, and transaction market value are reported quarterly during the transaction period to the Company, by applying internal rules of the Company mutatis mutandis.

(8) Method and period of amortization of goodwill

Goodwill is amortized in equal amounts mainly over 20 years.

(9) Other significant matters that are the basis for preparing the consolidated financial statements

Accounting method of bonds and other securities held for earning financial revenues for operating purposes (operational investment securities)

Those bonds and other securities are booked including ¥237,730 million in investment securities and ¥5,868 million in securities.

Further, these financial revenues (interest income, redemption difference, and partnership gains/loss corresponding to equity share) is booked under revenues.

(10) Accounting standards for consolidated subsidiaries outside Japan

In the event that the financial statements of a consolidated subsidiary of the Company locating outside Japan is prepared pursuant to the International Financial Reporting Standards or the U.S. accounting standards, those financial statements are used to prepare consolidated settlement of accounts.

In the event that the financial statements of a consolidated subsidiary of the Company locating outside Japan is prepared pursuant to the generally accepted accounting standards in its residing country other than the International Financial Reporting Standards or the U.S. accounting standards, said financial statements are prepared primarily pursuant to the International Financial Reporting Standards.

<Notes on changes in presentation>

(Consolidated Balance Sheet)

In the previous fiscal year, the “Provision for compensation losses,” which was included under “Other current liabilities” within “Current liabilities,” has been presented separately starting from the current fiscal

year due to its increased materiality. The “Provision for compensation losses” for the previous fiscal year was ¥968 million.

<Notes on accounting estimates>

(Impairment of leased assets)

If there are signs of impairment for leased assets, the Company determines whether to recognize impairment loss. If impairment loss is recognized, the Company depreciates the book value of the leased asset to the recoverable value and books the depreciation amount as an impairment loss.

Future cash flow used in the recoverable value is calculated by an estimate based on future lease fees, lease period, and value remaining upon fulfillment. The Company determines this estimate to be rational. However, if there are changes to the conditions precedent or the business environment, there may be significant impact on the consolidated financial statements from the next consolidated fiscal year on.

For the aircraft held by JSA International Holdings, L.P. group, which leases aircraft in the U.S. (¥1,627,012 million in leased assets at the end of the current fiscal year), the Company regularly confirms the future cash flow and determines whether to recognize impairment losses according to the U.S. accounting standards. In this determination, the Company compared book value and future cash flow before discount. For the assets whose future cash flow before discount is less than the book value, the Company booked the amount by which the book value exceeds the fair value as an impairment loss. Future cash flow comprises current lease fees, future lease fees, value remaining upon fulfillment, disposal costs, lease period, off-lease period, and renewal period. Future lease fees and the value remaining upon fulfillment are determined by an appraisal company. Disposal cost, lease period, off-lease period, and renewal period are calculated by estimating them based on past results, etc.

The Company booked ¥2,885 million in impairment losses for aircraft in cost of revenues in the consolidated statement of income for the current fiscal year.

(Valuation of goodwill, etc.)

If there are signs of impairment for goodwill and goodwill equivalents included in investment securities, the Company determines whether to recognize impairment loss. If impairment loss is recognized, the Company depreciates the book value to the recoverable value and books the depreciation amount as an impairment loss.

Future cash flow used in the recoverable value is calculated by an estimate based on the business plan, etc. prepared by considering the past business results and future business environment of the relevant company. The Company determines this estimate to be rational. However, if there are changes to the conditions precedent or the business environment, there may be significant impact on the consolidated financial statements from the next consolidated fiscal year on.

At the end of the current fiscal year, the Company booked ¥91,644 million as goodwill and ¥90,267 million as goodwill equivalents included in investment securities.

(Allowance for doubtful accounts)

Regarding the allowance for doubtful accounts, the subject receivables are classified into normal receivables, highly doubtful receivables and distressed receivables based on credit information such as the business conditions and payment status of the business partners and in accordance with the Company’s internal management regulations, and estimated uncollectible amounts are booked as allowance for doubtful accounts based on historical default rates for normal receivables, as well as considering the collectability of highly doubtful receivables and distressed receivables (receivables from legally or substantially bankrupt

obligors). The estimated unrecoverable amount is calculated based on the financial status of the business partners, the estimated recoverable value of collateral, and future cash flow, etc. in the cash flow estimation method.

In addition, the consolidated subsidiaries adopting the International Financial Reporting Standards located outside Japan apply IFRS 9 “Financial Instruments,” and based on the expected credit loss (ECL) model, post allowance for doubtful accounts after measuring their projected credit loss for 12 months or the entire expected remaining period using the loss ratio that is adjusted after past bad debt records and current and future economic situations, etc. are counted.

The consolidated subsidiaries adopting U.S. accounting standards located outside Japan apply Accounting Standards Update (ASU) 2016-13 “Financial Instruments - Credit Losses,” and based on the current expected credit loss (CECL) model, post allowance for doubtful accounts after measuring their projected credit loss for the expected remaining period using the loss ratio that is adjusted after past bad debt records and current and future economic situations, etc. are counted.

The Company determines this estimate to be rational. However, if there are changes to the conditions precedent or the business environment, there may be significant impact on the consolidated financial statements from the next consolidated fiscal year on.

At the end of the current fiscal year, the Company booked ¥60,377 million as allowance for doubtful accounts.

<Additional information>

(Performance-based stock compensation plan)

The Company has introduced a performance-based stock compensation plan (“Plan”) as an incentive plan for the Company’s directors excluding those who are Audit & Supervisory Committee members (excluding non-executive directors and non-residents in Japan; hereinafter the same applies) and executive officers, etc. (excluding non-residents in Japan; hereinafter directors and executive officers are collectively referred to as “Directors, etc.”).

1. Outline of the plan

The Plan is a stock compensation plan for the Company’s Directors, etc.

where the Company shares and cash equivalent to the conversion value of the Company shares (the “Company Shares, etc.”) are delivered or paid (the “Delivery, etc.”) based on the achievement level of performance targets of the Medium-term Management Plan of the Company. The Company entrusts money to a trust bank in advance to acquire the Company’s shares to be delivered, and the trust bank uses the cash to acquire the Company’s shares. Furthermore, points are granted to Directors, etc. based on the share delivery rules established separately, and the Company shares, etc. are delivered to Directors, etc. based on such points.

2. The Company’s shares remaining in the trust

The Company’s shares remaining in the trust are recorded as shares in Equity at the carrying amount at the trust. The carrying amount and the number of shares of these treasury shares at the end of the current fiscal year are ¥2,034 million and 2,395 thousand shares, respectively.

<Notes on consolidated balance sheet>

1. Displayed figures are rounded down to the nearest million yen.
2. Assets pledged as collateral and corresponding liabilities

(1) Assets pledged as collateral

	(Millions of yen)
Cash and deposits	31,873
Installment receivables	44,953
Lease receivables and investments in leases	713,056
Operating loans receivables	199,139
Other current assets	12,466
Leased assets	1,627,771
Other operating assets	121,099
Other intangible assets	21,063
Investment securities	20,691
Other investments and other assets	118
Operating lease contract receivables	168
Total	2,792,404

(2) Liabilities corresponding to assets pledged as collateral

	(Millions of yen)
Short-term borrowings	1,689
Bonds payable (including current portion of bonds payable)	9,500
Long-term borrowings (including current portion of long-term borrowings)	1,031,205
Current maturities of loans from the securitizations of the minimum future rentals on lease contracts (including long-term)	697,892
Other non-current liabilities	83
Total	1,740,370

(Note) Of the assets pledged as collateral, ¥8,125 million in operating loans receivables, and ¥16,967 million in investment securities have revolving pledge and mortgages as the collateral held by the investees for their borrowings from financial institutions.

3. Total depreciation of property, plant and equipment

	(Millions of yen)
Leased assets	1,615,693
Other operating assets	86,965
Own-used assets	19,471
Total	1,722,129

(Note) The total depreciation amount above includes total accumulated impairment loss.

4. Guarantee obligations, etc.

(1) Guarantee obligations, etc. in operations (including commitment to guarantee)

	(Millions of yen)
Operating guarantees amount	12,854

(2) Guarantee obligations, etc. for bank borrowings (including commitment to guarantee)

	(Millions of yen)
AYVENS MHC MOBILITY SERVICES MALAYSIA SDN. BHD. (Note)	1,316
Employee (residential funds)	6
Subtotal	1,323
Total	14,178

(Note) Changed its name from ALD MHC MOBILITY SERVICES MALAYSIA SDN. BHD.

5. The outstanding amounts of receivables generating from contracts with customers, contract assets, and contract liabilities are as follows:

	(Millions of yen)
Receivables from contracts with customers ^(*1)	12,568
Contract assets	-
Contract liabilities ^(*2)	16,538

(*1) Included mainly in lease and other receivables and other current assets in the consolidated balance sheet.

(*2) Included in other current liabilities in the consolidated balance sheet.

<Notes on consolidated statement of income>

1. Displayed figures are rounded down to the nearest million yen.

2. Gain on step acquisitions

This was due to increasing the investment in a silent partnership operated by Hokkaido Yakumo Solar Park G.K., which operates a solar power generation business, and two other companies, and making the company and the two other companies consolidated subsidiaries.

3. Provision for compensation losses

In response to issues regarding car loan fees in the UK, the financial conduct regulation body in the UK, the Financial Conduct Authority (FCA), announced a final compensation scheme for car loan customers on March 30, 2026.

The Company's consolidated subsidiary, Mitsubishi HC Capital UK PLC, established certain scenarios to prepare for loss on compensation that could arise in the future in relation to past automobile loan contracts and recorded provision for compensation losses. However, in response to the announcement of the final compensation scheme by the FCA, Mitsubishi HC Capital UK PLC revised the scenarios and likelihood of losses arising. As a result, since the provision for loss during the fiscal year under review is a one-time item, and of a large amount, we have recorded it under extraordinary losses.

4. Impairment losses

The following assets are booked as impairment loss.

(1) Property, plant and equipment

Use	Type	Impairment loss (Millions of yen)
Leased assets	Transportation equipment (aircraft)	2,885
Leased assets	Transportation equipment (aircraft engines)	2,202

Some of the Company's consolidated subsidiaries use individual aircraft as the grouping unit for assets related to aircraft leases and individual aircraft engines as the grouping unit for assets related to aircraft engine leases to determine whether there is any indication of impairment. The book value of leased assets that declined in profitability due to lower future cash flow expected to occur was depreciated to the recoverable value and the depreciation amount was booked as an impairment loss to cost of revenues.

The recoverable value of the asset is mainly determined based on its net selling price, which is calculated based on the planned selling price and other factors.

(2) Intangible assets

Use	Type	Impairment loss (Millions of yen)
-	Other intangible assets	9,578

Some of the Company's consolidated subsidiaries use lease contracts for individual aircraft as the grouping unit for assets to determine whether there is any indication of impairment. The book values of intangible assets related to aircraft leases for which indications of impairment were recognized due to factors such as changes in lease contract conditions have been reduced to the recoverable amounts, and the reduction amounts have been recorded as impairment loss in cost of revenues.

Regarding the recoverable amount of the said assets, if it is assessed that no future cash flows are expected, the recoverable amount is valued at zero. However, if future cash flows are expected, the recoverable amount is calculated by discounting such cash flows at a rate of 5.2%.

<Notes on consolidated statement of changes in equity>

1. Displayed figures are rounded down to the nearest million yen.

2. Matters related to type and total number of issued shares (Thousands of shares)

	Number of shares at beginning of current fiscal year	Number of shares increased during current fiscal year	Number of shares decreased during current fiscal year	Number of shares at end of current fiscal year
Issued shares				
Common shares	1,466,912	–	–	1,466,912
Total	1,466,912	–	–	1,466,912

3. Matters related to dividends

(1) Dividend payment amount

1) The following was resolved at the Board of Directors meeting held on May 21, 2025.

- Matters related to common share dividends

(a) Total amount of dividends	¥28,761 million
(b) Dividend amount per share	¥20.00
(c) Record date	March 31, 2025
(d) Effective date	June 9, 2025

(Note) The total amount of dividends resolved at the Board of Directors meeting held on May 21, 2025 includes ¥50 million in dividends on the Company's shares held by the Trust as part of the performance-based stock compensation plan.

2) The following was resolved at the Board of Directors meeting held on November 14, 2025.

- Matters related to common share dividends

(a) Total amount of dividends	¥31,640 million
(b) Dividend amount per share	¥22.00
(c) Record date	September 30, 2025
(d) Effective date	December 5, 2025

(Note) The total amount of dividends resolved at the Board of Directors meeting held on November 14, 2025 includes ¥52 million in dividends on the Company's shares held by the Trust as part of the performance-based stock compensation plan.

(2) Of the dividends whose record date is within the current period, those whose effective date is in the next period

The following is scheduled to be resolved at the Board of Directors meeting held on May 20, 2026.

- Matters related to common share dividends

(a) Total amount of dividends	¥34,519 million
(b) Source of dividends	Retained earnings
(c) Dividend amount per share	¥24.00
(d) Record date	March 31, 2026
(e) Effective date	June 8, 2026

(Note) The total amount of dividends resolved at the Board of Directors meeting held on May 20, 2026 includes ¥57 million in dividends on the Company's shares held by the Trust as part of the performance-based stock compensation plan.

4. Matters related to share acquisition rights at end of current fiscal year

Date of resolution by Board of Directors	Type of shares to be delivered	Number of shares to be delivered	Number of outstanding share acquisition rights
September 27, 2012	Common shares	21,600	216
September 26, 2013	Common shares	14,700	147
September 25, 2014	Common shares	31,500	315
September 29, 2015	Common shares	55,500	555
September 29, 2016	Common shares	92,000	920
September 27, 2017	Common shares	177,300	1,773
June 28, 2018	Common shares	159,100	1,591
June 25, 2019	Common shares	282,700	2,827
June 24, 2020	Common shares	312,700	3,127
June 25, 2021	Common shares	630,700	6,307
June 28, 2022	Common shares	714,000	7,140

<Notes on financial instruments>

1. Matters related to the status of financial instruments

(1) Policies and initiatives for financial instruments

The Group mainly operates businesses of leasing, installments, and financial transactions.

In order to operate these businesses, the Group uses direct financing such as the issuance of bonds and commercial papers and securitization of receivables, as well as indirect financing such as bank borrowings.

The Group conducts comprehensive management of assets and liabilities (ALM) in order to properly manage and operate interest rate fluctuation risks that occur by the mismatch of interest rate formats and contract periods for asset management and financing.

Also, derivative transactions are used to hedge interest rate and currency rate fluctuations risks. The Group does not conduct such transactions for investment or short-term sales gains.

(2) Details and risks of financial instruments

The financial assets held by the Group are mainly receivables related to lease, installment, and financial transactions. There are credit risks stemming from non-payment of lease fees, etc. due to bankruptcy of the business partner.

Available-for-sale securities and investment securities are primarily shares, bonds, and investments in partnerships. The Company holds them for operating purposes for earning financial revenues or business promotion. Each security bears a credit risk of the issuer, interest rate fluctuation risk, and market value fluctuation risk.

Borrowings, bonds payable, and commercial papers, etc., bear liquidity risks in which the Group may be unable to secure payment on the payment date in cases such as an inability to liquidate the securities in the market under certain conditions. Also, payment obligations with variable interest rates bear interest rate fluctuation risks.

The main capital operation of the Group is lease, installment, and finance transactions. Certain receivables related to lease fee receivables, installment receivables, and financing transactions is based on fixed interest rate. On the other hand, some financing with variable interest rates bears interest rate fluctuation risks. The Company uses interest rate related derivative transactions to comprehensively hedge interest rate fluctuations risks and secure stable profit by guaranteeing profit from individual sales projects. In order to hedge currency exchange rate fluctuation risks for individual assets and liabilities denominated in foreign currencies, the Company hedges by currency-related derivative transactions and liabilities denominated in foreign currencies.

The Group applies hedge accounting related to derivative transactions, etc. Details are included in <Notes to basis of preparing consolidated financial statements> 4. Matters related to accounting policies (7) Important hedge accounting methods.

The derivative transactions of the Group bear market risks and credit risks. The derivative transactions of the Group play the role of reducing market risks of the entire Group because they mainly reduce interest rate and currency rate fluctuations risks of hedged assets and liabilities.

(3) Risk management System related to financial instruments

1) Credit risk management

The Group conducts credit management of each business partner group through individual credit checks that are based on overall strategy, status of capital, and credit rating portfolio, in compliance with the Credit Risk Management Rules. Credit management is conducted through the sales department and credit department, which submit a proposal for deliberation and report to the

Risk Management Committee, Executive Committee, and Board of Directors regularly. Also, the internal audit department verifies and audits management status.

2) Market risk management

The Group manages market risks, primarily interest rate fluctuation risk, based on the rules for market risk management.

In order to properly manage and operate interest rate fluctuation risks, the Group regularly monitors the status of mismatching in interest rate formats and contract periods for asset management and financing, as well as always pays close attention to interest rate situations.

Regarding the status of interest rate fluctuation risks, the Company holds quarterly meetings of the ALM Committee, comprising officers and department heads of related departments. This committee analyzes market conditions and portfolios of assets and liabilities, and deliberates the current risk management policy. In addition, the status of interest rate fluctuation risks is reported to the Risk Management Committee, which is held regularly.

3) Exchange rate fluctuation risk management

The Company hedges exchange rate fluctuation risk by using derivative transactions related to currencies and procuring liabilities denominated in foreign currencies corresponding to assets denominated in foreign currencies. The status of exchange rate fluctuation risk is reported to the Risk Management Committee.

4) Price fluctuation risk management

Price fluctuation risks of securities and investment securities are reported to the Risk Management Committee. Furthermore, because most shares are held for the purpose of transaction promotion, the Company monitors the financial status of the business partner, confirms the status of the transaction, and verifies from a capital cost perspective to determine whether or not to continue the holding.

5) Liquidity risk management related to financing

The Group monitors the capital management status of the entire Group and adjusts the long- to short-term procurement balance. The Group also strives to secure capital liquidity by acquiring commitment lines from multiple financial institutions and promoting diversification of financing avenues. Furthermore, the Company monitors the probability of risks emerging in the financing environment based on the Liquidity Risk Management Rules of the Company, and reports the status of liquidity risks monthly to the pertinent officers. Pertinent officers determine the stage of the liquidity risks and the results of this determination are reported to the ALM Committee and Risk Management Committee. Also, the Company establishes contingency plans for each stage and has constructed a system to execute the appropriate plan when the unexpected event occurs.

6) Derivative transactions

Based on internal rules, use purpose and approval authority have been set for derivative transactions. The use purpose of derivative transactions is to hedge against interest rate and currency exchange rate fluctuation risks. The Treasury Department implements them on individual transactions of the Company. Regarding interest rate fluctuation risks, the Company comprehensively manages assets and liabilities through ALM and manages currency exchange rate fluctuation risks on an individual basis. The status of derivative transactions is reported quarterly to the officer in charge. The Company also manages credit risk due to defaults by business partners by establishing credit limits based on the credit and transaction status of each business partner.

- (4) Supplementary explanation about matters related to market value, etc. of financial instruments
Because certain assumptions are adopted to calculate the market value of financial instruments, the price may vary depending on different assumptions.

2. Matters related to details, etc. by market value level of financial instruments

Carrying amount, market value, and differences recorded in the consolidated balance sheet are as follows: Besides, pursuant to paragraph (5) of the “Implementation Guidance on Disclosures about Fair Value of Financial Instruments” (ASBJ Guidance No. 19, the “Fair Value Disclosure Implementation Guidance”), shares with no market value, etc. are not included in the following table. Besides, investment in partnerships, etc. where the net amount equivalent to the equity interests were recorded in the consolidated balance sheet with the handling pursuant to paragraph (24-16) of the “Implementation Guidance on Accounting Standard for Fair Value Measurement” (ASBJ Guidance No. 31) applied are also not booked in the following table.

The market values of financial instruments are categorized into the following three levels based on their input observability and importance.

Level 1 market value: Of the inputs related to observable market value calculation, those calculated based on the market prices of assets or liabilities that are objects to calculate market values in a brisk exchange market

Level 2 market value: Market value, other than level 1 market values, where directly or indirectly observable inputs are used to calculate market values

Level 3 market value: Market values calculated by using important but not observable inputs

In the cases where multiple inputs having important impact on market value calculation are used, of the inputs having a respective level, the input having the lowest level of priority order is used to categorize market values.

(1) Financial instruments with a market value in the consolidated balance sheet

(Millions of yen)

Category	Market value			
	Level 1	Level 2	Level 3	Total
(1) Securities and investment securities				
Available-for-sale securities				
Shares	14,285	—	8,760	23,046
Government bonds, municipal bonds, etc.	5,871	—	—	5,871
Bonds payable	—	17,624	—	17,624
Other	—	8,263	196	8,459
(2) Derivative transactions (*1, *2)				
Currencies related	—	(44,997)	—	(44,997)
Interests related	—	20,188	—	20,188
Total assets	20,157	1,078	8,957	30,193

(*1) Net receivables and liabilities occurring by derivative transactions are presented by net amount. Amounts in parentheses show that those are net liabilities.

(*2) Of the derivative transactions, the amount of the transactions adopting hedge accounting in the consolidated balance sheet records ¥(24,515) million.

(2) Financial instruments except those with market values in the consolidated balance sheet

Cash and deposits, notes and accounts payable - trade, short-term borrowings and commercial paper represent cash or are settled in a short-term, reflecting the value close to the booked value. Such financial instruments are, therefore, not presented here.

(Millions of yen)

Category	Market value				Carrying amount	Difference
	Level 1	Level 2	Level 3	Total		
(1) Installment receivables ^(*1) Allowance for doubtful accounts ^(*2)			181,365	181,365	181,103 (1,610) 179,493	1,872
(2) Lease receivables and investments in leases ^(*3) Allowance for doubtful accounts ^(*2)	–	64,495	3,165,212	3,229,707	3,186,012 (8,381) 3,177,630	52,076
(3) Operating loans receivables Allowance for doubtful accounts ^(*2)	–	–	2,104,579	2,104,579	2,133,536 (14,879) 2,118,657	(14,078)
(4) Other operating loans receivables Allowance for doubtful accounts ^(*2)	–	463	233,143	233,607	234,005 (676) 233,329	278
(5) Securities and investment securities Held-to-maturity debt securities Government bonds, municipal bonds, etc.	4,160	–	–	4,160	4,314	(153)
(6) Distressed receivables Allowance for doubtful accounts ^(*2)	–	–	38,996	38,996	70,882 (31,885) 38,996	–
Total assets	4,160	64,959	5,723,296	5,792,416	5,752,420	39,996
(7) Bonds payable	–	2,458,938	–	2,458,938	2,481,204	(22,266)
(8) Long-term borrowings	–	5,024,319	–	5,024,319	5,046,087	(21,768)
(9) Current maturities of loans from the securitizations of the minimum future rentals on lease contracts	–	690,558	–	690,558	697,892	(7,334)
Total liabilities	–	8,173,815	–	8,173,815	8,225,185	(51,369)

(*1) Carrying amount excludes deferred profit on installment sales.

(*2) Installment receivables, lease receivables and investments in leases, operating loans receivables, other operating loans receivables, and distressed receivables exclude allowance for doubtful accounts for each.

(*3) Difference with the carrying amount on the consolidated balance sheet was ¥87,162 million in estimated remaining value related to finance leases that do not transfer ownership.

(Notes) 1. Description of the valuation method for market value calculation and of inputs related to market value calculation

Financial instruments with a market value in the consolidated balance sheet

(1) Securities and investment securities

Securities listed on the exchange market book market values at the market, which are categorized into the market values at level 1. Unlisted stocks whose market value is measured using important but not observable inputs are categorized into market values at Level 3.

Receivables with a published market value are booked at said market value, while government bonds and municipal bonds are categorized as having level 1 market values, and the receivables other than mentioned above are categorized as having level 2 market values. Bonds having no published market value but having variable interest rates reflect the market interest rate in a short term. Therefore, as long as the credit status of the issuer does not change significantly after the issuance, the book value is shown as the market value because they are deemed to be close to each other. On the other hand, the market value of securities with fixed interest rates is the amount of future cash flow discounted after the spread is added to the term-end risk free rate. Said securities use observable inputs and are categorized as having level 2 market values.

(2) Derivative transactions

The market value of derivative transactions is calculated based on the price presented by financial institutions or the discounted present value calculated using observable inputs, and is categorized into level 2 market value. Items using special treatment for interest rate swaps or allocation treatment for forward exchange contracts and currency swaps are treated together with long-term borrowings, etc. subject to hedge accounting. Therefore, their market value is included in the market value of relevant liabilities (see “Financial instruments except those with market values in the consolidated balance sheet” (8)).

Financial instruments except those with market values in the consolidated balance sheet

(1) Installment receivables

The total recoverable amount in the categories based on internal rating, period, etc. is discounted by the rate projected if a new installment is to be sold, or the total amount after estimated bad debts are deducted from the amount of projected recoverable in the categories based on internal rating, period, etc. is discounted by the term-end risk free rate, to calculate market values, which are categorized into level 3 market value.

(2) Lease receivables and investments in leases

The total amount after estimated maintenance costs are deducted from the projected recoverable amount in the categories based on internal rating, period, etc. is discounted by the rate projected if a new similar lease transaction is made, or the total amount after estimated maintenance costs and estimated bad debts are deducted from estimated amount recoverable in the categories based on internal rating, period, etc. is discounted by the term-end risk free rate, to calculate market values. In the case of using important but not observable inputs, level 3 market value is applied, and in the case of not using such inputs, level 2 market value is applied to categorize.

(3) Operating loans receivables

Operating loans receivables with variable interest rates reflect the market interest rate in a short term. Therefore, as long as the credit status of the borrower does not change significantly after disbursement of the loan, the book value is shown as the market value because they are deemed to

be close to each other. For those with a fixed interest rate, the total principal and interest is discounted by a rate projected if a similar new loan is made in the categories based on the type of loan, internal rating, period, etc., or the estimated bad debts are deducted from the total of principal and interest in the categories based on the type of loan, internal rating, period, etc. which is then discounted by the term-end risk free rate, to calculate market values. These are categorized as having level 3 market values.

(4) Other operating loans receivable

The total principal and interest is discounted by a rate projected if a similar new loan is made in the categories based on the type of loan, internal rating, period, etc., or the estimated bad debts are deducted from the total of principal and interest in the categories based on the type of loan, internal rating, period, etc. which is then discounted by the term-end risk free rate, to calculate market values. For items settled in a short term, the book value is shown as the market value because they are close to each other. Securities using important but not observable inputs are categorized as having level 3 market values, while the other securities are categorized as having level 2 market values.

(5) Securities and investment securities

Held-to-maturity debt securities with a published market value are booked at said market value, with government bonds and municipal bonds categorized as having Level 1 market values, and all others categorized as having Level 2 market values.

(6) Distressed receivables

Estimated unrecoverable amount of distressed receivables is calculated based on the expected recoverable amount, etc. through collateral and guarantees. Therefore, the market value is deemed to be close to the amount obtained by deducting the estimated unrecoverable amount from the carrying amount on the consolidated balance sheet date, and thus said amount is shown as the market value, which are subject to the category of level 3 market value.

(7) Bonds payable

Of the bonds issued by the Group, the book value is shown as the market value for those settled in a short term because they are close to each other. In addition, of the bonds settled in a long term, those with variable interest rates reflect market interest rates in a short term, and the credit status of the Group did not change significantly after actual issuance. Therefore, the book value is shown as the market value because they are deemed to be close to each other. The bonds with a market value, except those mentioned above, is based on the market value, while the market value of bonds with no market value is mainly calculated by discounting the total principal and interest of said bonds categorized by certain periods by the rate expected in the case where the similar funding. These are categorized as having level 2 market values.

(8) Long-term borrowings

Of long-term borrowings, those with variable interest rates reflect market interest rates in a short term, and the credit status of the Group did not change significantly after the borrowing. Therefore, the book value is shown as the market value because they are deemed to be close to each other. The market value of long-term borrowings with fixed interest rates is calculated by discounting the total principal and interest of long-term borrowings (*) categorized by set periods by the rate expected in the case where the similar funding. These are categorized as having level 2 market values.

- (*) Long-term borrowings subject to special treatment for interest rate swaps use the total amount of the principal and interest treated together with the interest rate swap. Long-term borrowings subject to allocation treatment for currency swaps use the total amount of the principal and interest treated together with the currency swap.
- (9) Current maturities of loans from the securitizations of the minimum future rentals on lease contracts
Of current maturities of loans from the securitizations of the minimum future rentals on lease contracts, those with variable interest rates reflect market interest rates in a short term, and the credit status of the Group did not change significantly after issuance. Therefore, the book value is shown as the market value because they are deemed to be close to each other. The market value of items with fixed interest rates is calculated by discounting, by the rate expected at similar funding, the total principal and interest of current maturities of loans from the securitizations of the minimum future rentals on lease contracts categorized by certain periods. These are categorized as having level 2 market values.

(Notes) 2. Information on the financial instruments having level 3 market value in the consolidated balance sheet

(1) Quantitative information regarding important but not observable inputs

Category	Valuation method	Important but not observable inputs	Scope of inputs	Weighted average of inputs
Securities and investment securities				
Shares	Discounted present value method	Discount rate	12.50%	12.50%

The market value of unlisted stocks held by overseas consolidated subsidiaries that apply the International Financial Reporting Standards were calculated using the present value method. In doing so, future cash flow and discount rate were used as important but not observable input, and the stocks were categorized as having level 3 market value. The future cash flow was estimated by considering factors such as future profitability, capital outlay, and repayment of debt. A significant increase (decrease) in future cash flow will cause a marked rise (fall) to the market value of the shares.

Other financial instruments are omitted from presentation due to their insignificance in terms of monetary value.

(2) Table of adjustments from the beginning balance to the term-end balance, valuation loss and profit recognized in the current fiscal year

Category	Securities and investment securities		Total
	Shares	Other	
Beginning balance	10,235	424	10,659
Income/loss or other comprehensive income for the current year			
Recorded as income or loss ^(*)	180	–	180
Recorded as other comprehensive income	1,110	–	1,110
Purchase, disposal and redemption			
Purchase	2,048	–	2,048
Disposal and redemption	(4,814)	(228)	(5,043)
Transfer to level 3 market value	–	–	–
Transfer from level 3 market value	–	–	–
Balance at end of fiscal year	8,760	196	8,957
Valuation gain or loss ^(*) on financial assets and financial liabilities held in the consolidated balance sheet as of the settlement day, of their amounts of gain or loss recorded for the current fiscal year	180	–	180

(*)1) Included mainly in Other non-operating income in the Consolidated Statement of Income.

(3) Description of market value valuation process

Market values are measured by the management department independent from the sales department pursuant to the prescribed rules. A valuation model that can most appropriately reflect individual natures, characteristics, and risks of financial instruments is adopted.

In addition, the management department monitors changes in important indexes that may have impact on market value fluctuations to check consistency with price fluctuations.

(4) Description of impact on market values in the case where important but not observable input is changed

Discount rate

The discount rate, which is an important but not observable input, is an adjustment rate to the market interest rate and is composed primarily of a risk premium and others that reflect the amount market participants require as compensation for the uncertainty of cash flows from financial instruments. A substantial rise (fall) of the discount rate will cause a marked fall (rise) to the market value of the shares.

<Notes on rental properties>

The Group owns rental office buildings, commercial facilities, housing units, and logistics warehouses in major cities across Japan. Gain on leases related to rental properties in the current fiscal year was ¥12,921 million (major rental income and expenses are booked to revenues and cost of revenues) and gain on sales was ¥12,021 million (major sale income and expenses are booked to revenues and cost of revenues).

The carrying amount of rental properties, amount change during fiscal year, and market value are as follows.

(Millions of yen)

Carrying amount			Market value at end of current fiscal year
Balance at beginning of current fiscal year	Amount change during current fiscal year	Balance at end of current fiscal year	
419,836	148,793	568,630	629,795

- (Notes) 1. Carrying amount is the amount subtracting accumulated depreciation amount from acquisition cost.
2. Of the increase (decrease) for the current fiscal year, the major increase was due to the acquisition of real estate (¥176,646 million) and the acquisition of newly consolidated subsidiaries (¥60,054 million), and the major decrease was due to the sale of real estate (¥89,289 million).
3. The market value of major properties at the end of the current fiscal year is the amount determined by the capitalization method and the amount based on a real estate appraisal evaluation by an outside real estate appraiser. However, if there are no important changes to indicators that is considered to reflect the certain valuation amount and appropriate market price from the most recent valuation, market value will be the most recent valuation amount adjusted appropriately. For other properties, market value is the amount based on indicators that is considered to reflect market price and the amount reasonably calculated in-house based on the capitalization method. The market value of properties newly acquired during the current fiscal year such as some buildings in which the changes to market value and depreciation will not be significant is based on the proper book value.

<Notes on revenue recognition>

(Information on disaggregation of revenue)

Information disaggregating revenue from contracts with customers

Notes on non-consolidated financial statements

<Notes on matters related to important accounting policies>

1. Valuation standards and method for securities

(1) Subsidiary shares and affiliate shares

Cost method based on the moving average method

(2) Of available-for-sale securities, bonds and other securities held for earning financial revenues for operating purposes (operational investment securities)

- Other than shares that have no market value

Fair value method

(Valuation differences are included directly in net assets and costs of securities sold are determined by the moving average method.)

- Shares with no market value, etc.

Cost method based on the moving average method

For investments in limited liability investment partnerships and similar entities (deemed to be securities based on Article 2, paragraph (2) of the Financial Instruments and Exchange Act), these are stated by the net amount corresponding to the Company's equity share based on the most recent obtainable financial statements depending on the reporting date established by the partnership agreement.

(3) Available-for-sale securities not included above

- Other than shares that have no market value

Fair value method

(Valuation differences are included directly in net assets and costs of securities sold are determined by the moving average method.)

- Shares with no market value, etc.

Cost method based on the moving average method

For investments in limited liability investment partnerships (deemed to be securities based on Article 2, paragraph (2) of the Financial Instruments and Exchange Act), these are stated by the net amount corresponding to the Company's equity share based on the most recent obtainable financial statements depending on the reporting date established by the partnership agreement.

(4) Investments in other securities of subsidiaries and associates

Cost method based on the moving average method

For investments in partnerships (deemed to be securities based on Article 2, paragraph (2) of the Financial Instruments and Exchange Act), these are stated by the net amount corresponding to the Company's equity share based on the most recent obtainable financial statements depending on the reporting date established by the partnership agreement.

2. Valuation standards and method for derivatives

Fair value method

3. Valuation standard and method for inventories

Cost method based on the specific-cost method

(Balance sheet values are calculated using the method of writing down the book value based on declining profitability)

4. Method of depreciation for fixed assets

(1) Leased assets

Depreciation is calculated with the lease period considered as the depreciation years, and using the straight-line method based on the standard that the estimated disposal value of a leased asset at the fulfillment of the lease period to be the residual value.

(2) Own-used assets

Depreciation is calculated with declining balance method.

However, for buildings (excluding equipment attached to buildings), as well as equipment attached to buildings and structures acquired on or after April 1, 2016, depreciation is calculated using the straight-line method.

(3) Other intangible assets (excluding goodwill)

Calculated using the straight-line method.

For software (used internally), amortization is calculated using the straight-line method based on expected usable period (five years) in the Company.

(4) Long-term prepaid expenses

Calculated using the straight-line method.

5. Accounting method for deferred assets

Bond issuance costs are depreciated in interest rule for the period until their redemption.

6. Translation criteria of assets and liabilities denominated in foreign currencies into Japanese yen

Monetary claims and liabilities denominated in foreign currencies are translated into Japanese yen by using the spot exchange rates on the balance sheet date, and the difference arising from such translation is stated as gain or loss. Monetary claims and liabilities denominated in foreign currencies subject to allocation treatment, such as forward exchange, etc., are translated into a forward exchange in Japanese yen.

7. Accounting policy for allowances and provisions

(1) Allowance for doubtful accounts

To reserve for loss on doubtful accounts, estimated uncollectible amounts are booked based on historical default rates for general receivables, or based on individual consideration of collectability for doubtful receivables and distressed receivables (receivables from legally or substantially bankrupt obligors).

Also, the Company applies the “Treatment on the calculation of default estimates” established in “Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Lease Industry” (The Japanese Institute of Certified Public Accountants Industry Committee Practical Guidance No. 19, revised on September 13, 2024).

With respect to the amount of distressed receivables, the amount expected to be recoverable is deducted from the receivable amount, and the remainder, which is treated as the estimated amount of uncollectible receivables, is directly deducted from the receivable amount. This amount is ¥4,105 million.

- (2) Provision for bonuses
The Company books the amount expected to be paid in the following year that are attributable to the current fiscal year in order to issue payment for bonuses to employees.
- (3) Provision for bonuses for directors (and other officers)
The Company books the amount expected to be paid in the following year that are attributable to the current fiscal year in order to issue payment for bonuses to officers, executive officers, etc.
- (4) Provision for share awards for directors (and other officers)
To provide for the delivery of the Company's shares for directors and other officers in accordance with the performance-based stock compensation plan, the Company books the amount expected to be paid at the end of the current fiscal year.
- (5) Provision for retirement benefits (prepaid pension costs)
The Company books provisions based on expected pension assets and retirement benefit liabilities at the end of the current fiscal year in order to pay employee retirement benefits.
As of the end of the current fiscal year, the estimated value of pension assets exceeded the estimated amount of retirement benefit obligations, adjusted upward or downward to account for unrecognized past service costs and unrecognized actuarial gains and losses. Therefore, the excess amount is recognized as prepaid pension costs.
 - 1) Method of attributing estimated retirement benefits for periods of service
In the calculation of retirement benefits liabilities, the method of attributing the estimated amount of retirement benefits to the period until the end of the current fiscal year is on the benefit formula basis.
 - 2) Amortization of actuarial gains and losses and past service cost
Past service cost is amortized using the straight-line method for the average remaining service years of employees (11 to 15 years) at the time of occurrence.
Pertaining to the actuarial gains and losses, the pro-rata amount calculated using the straight-line method for the average remaining service years of employees (11 to 17 years) at the time of occurrence in each fiscal year is amortized from the respective following fiscal years.
- (6) Provision for loss on guarantees
To prepare for potential losses related to debt guarantees, the Company records estimated loss amounts based on the financial condition and other factors of the guaranteed parties.

8. Accounting standards for income and expenses

- (1) Accounting method for lease transactions
 - 1) Accounting standards of revenues and cost of revenues related to finance lease transactions
The Company books the revenues and cost of revenues corresponding to the elapsed period based on a standard of a monthly lease fee to be received under the lease agreement for the duration of the lease agreement period.
 - 2) Accounting standards of revenues related to operating lease transactions
The Company books lease fees corresponding to the elapsed period based on a standard of a monthly lease fee to be received under the lease agreement for the duration of the lease agreement period.
Disposal amount and cost related to disposal of leasing assets are booked as revenues and cost of revenues.

- (2) Accounting standards of revenues and cost of revenues related to installment sales transactions Pursuant to the “Treatment of Installment Sale Transactions” stated in the “Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Lease Industry” (The Japanese Institute of Certified Public Accountants Industry Committee Practical Guidance No. 19, November 14, 2000), total of installment sale receivables is recorded as installment receivables when an instalment sale contract is concluded, and installment sales and cost of installment sales, which correspond to said policy duration based on the payment date in the installment contract, are recorded.

Unrealized profit corresponding to installment receivables with a future payment date adopt deferred accounting as deferred profit on installment sales.

- (3) Accounting policy for financing expenses

Financing expenses are categorized and booked under financing expenses for operating income and other financing expenses.

Total assets are categorized as assets based on operating transactions and other assets. Based on the balance of these assets, financing expenses corresponding to operating assets are booked in cost of revenues as capital costs while financing expenses corresponding to other assets are booked as non-operating expenses.

Furthermore, capital costs are booked after deducting the interest income of corresponding deposits from financing expenses related to operating assets.

9. Hedge accounting methods

- (1) Hedge accounting methods

The Company applies the deferred hedge method.

The Company applies allocation treatment for forward exchange that meets to requirements of allocation treatment, and the Company applies special treatment for interest rate swaps that meet requirements of special treatment.

- (2) Hedge instruments and hedged items

Hedge instruments... Interest rate swap instruments, forward exchange contracts, investment in equity for overseas subsidiaries and overseas affiliates, and other liabilities denominated in foreign currencies related to available-for-sale securities denominated in foreign currencies

Hedged items..... Borrowings, investment in equity for overseas subsidiaries and overseas affiliates, and available-for-sale securities denominated in foreign currencies

- (3) Hedge policies and methods to evaluate hedge effectiveness

In order to hedge interest rate and foreign currency rate fluctuation risks, and maintain a stable income, the Company performs derivative transactions based on internal rules.

Regarding interest rate fluctuation risks, lease fee receivables and installment receivables, etc., the primary operating assets of the Company, adopt a long-term fixed interest rate. On the other hand, because there are variable interest rates within the financing through bank borrowings, etc., the Company manages and performs comprehensive hedges so that the expected principal of derivative transactions that are hedging instruments is within the scope of hedged liabilities based on the comprehensive management of assets and liabilities (ALM). Furthermore, the Company uses interest rate-related derivative transactions for the purpose of locking in profit on individual projects.

Regarding foreign currency exchange rate fluctuation risks, the Company uses currency-related derivative transactions and hedges through liabilities denominated in foreign currencies for individual assets and liabilities denominated in foreign currencies, investment in equity for overseas subsidiaries and overseas affiliates, and available-for-sale securities denominated in foreign currencies.

The Company evaluates the effectiveness of hedges by verifying whether the interest rate of hedged items and the foreign currency exchange rate fluctuation risk are diminished. However, interest rate swaps performed by special treatment are not included in the evaluation of effectiveness.

Transaction status is reported quarterly to the officer in charge.

10. Other significant matters that are the basis for preparing the non-consolidated financial statements

- (1) Accounting method of bonds and other securities held for earning financial revenues for operating purposes (operational investment securities)

The Company booked ¥54,097 million in investment securities, ¥1,585 million in securities, and ¥41,702 million in investments in other securities of subsidiaries and associates.

Further, these financial revenues (interest income, redemption difference, and partnership gains/loss corresponding to equity share) is booked under revenues.

- (2) Accounting methods related to retirement benefits

The accounting method of unrecognized actuarial gains and losses related to retirement benefits and unaccounted amount of unrecognized past service costs differs from the accounting method in the consolidated financial statements.

- (3) Method and period of amortization of goodwill

Goodwill is amortized in equal amounts over 20 years.

<Notes on accounting estimates>

(Allowance for doubtful accounts)

Regarding the allowance for doubtful accounts, the subject receivables are classified into normal receivables, highly doubtful receivables and distressed receivables based on credit information such as the business conditions and payment status of the business partners and in accordance with the Company's internal management regulations, and estimated uncollectible amounts are booked as allowance for doubtful accounts based on historical default rates for normal receivables, as well as considering the collectability of highly doubtful receivables and distressed receivables (receivables from legally or substantially bankrupt obligors). The estimated unrecoverable amount is calculated based on the financial status of the business partners, the estimated recoverable value of collateral, and future cash flow, etc. in the cash flow estimation method.

The Company determines this estimate to be rational. However, if there are changes to the conditions precedent or the business environment, there may be significant impact on the non-consolidated financial statements from the next fiscal year on.

The Company booked ¥6,806 million in allowance for doubtful accounts at the end of the current fiscal year.

<Notes on per share information>

Equity per share	¥572.29
Earnings per share	¥50.46

(Note) The Company's shares held by a trust under a performance-based stock compensation plan are included in the number of treasury shares subtracted from the total number of issued shares at the end of the period when calculating equity per share (2,395 thousand shares as of March 31, 2026). In addition, they are also included in the number of treasury shares deducted in the calculation of the weighted average number of shares outstanding for the purpose of calculating earnings per share (2,431 thousand shares as of March 31, 2026).

<Notes on significant subsequent events>

None.

<Notes on company subject to consolidated dividend regulations>

The Company is subject to consolidated dividend regulations.

<Other notes>

(Transactions etc. under common control)

At the Board of Directors meeting held on December 20, 2024, the Company resolved to execute a company split, effective April 1, 2025, whereby its domestic real estate finance business managed by the Real Estate Business segment will be succeeded by Mitsubishi HC Capital Realty Inc. (hereinafter, "Mitsubishi HC Capital Realty"), a wholly owned subsidiary engaged in the real estate investment business. An absorption-type company split agreement was entered into on January 10, 2025, and the company split was executed on April 1, 2025.

1. Overview of the transaction

(1) Overview of the spun-off business

• Details of business	The domestic real estate finance business managed by the Company's Real Estate Business segment.
• Assets	¥294,479 million
• Liabilities	—
• Total equity	(0)

(2) Effective date of the company split
April 1, 2025

(3) Legal form of the company split

An absorption-type company split in which the Company is the splitting company and Mitsubishi HC Capital Realty is the successor company.

(4) Purpose of transaction

The purpose of this company split is to integrate the Company's human and management resources related to real estate finance into Mitsubishi HC Capital Realty and operate the real estate finance business and real estate investment business as a unified structure. Through this integration, the Company aims to further grow its real estate business, achieve more efficient and effective business operations, and build a portfolio that can flexibly respond to changes in the real estate market environment.

2. Overview of accounting treatment

It was treated as a transaction under common control based on the "Accounting Standard for Business Combinations" (ASBJ Statement No. 21, January 16, 2019) and the "Implementation Guidance on Accounting Standard for Business Combinations and Accounting Standard for Business Divestitures" (ASBJ Guidance No. 10, January 16, 2019).
