## Reasons for Selection of Skills

- The Group has established Our 10-Year Vision (“Together we innovate, challenge and explore the frontiers of the future”) as a milestone toward the realization of its management philosophy.  
In working toward this vision, we have reviewed the skills the Board of Directors should possess and have now disclosed the reasons for selecting each skill.
- From the three perspectives of “overall management,” “revenue growth,” and “strengthening the management foundation,” the following nine skill items have been selected.

Category	Skill	Reason for selection
Matters related to overall management	Corporate management	➤ Achieving Our 10-Year Vision, which serves as a milestone toward realizing the Company’s management philosophy, requires accurately identifying materiality (material issues) and addressing them through management initiatives. To that end, we believe it is essential to have the ability to boldly drive company-wide transformation, including SX(*1), DX(*2), and business portfolio transformation, as well as the ability to oversee these initiatives. We also believe it is essential to have the ability to build and promote systems that support sound corporate management rooted in compliance, as well as the ability to oversee these activities. (*1) Sustainability Transformation (*2) Digital Transformation
	Finance	➤ We believe it is essential to have a deep understanding of the Company’s business as a financial services provider, as well as deep insight into domestic and international finance, and the ability to apply that expertise to the promotion and oversight of the Company’s management and business strategies.
	Global	➤ The Company’s business is broadly and globally expanded, and we believe it is essential to have deep insight into global business, including cross-cultural and geopolitical considerations, as well as the ability to apply that insight to the promotion and oversight of management.
	Sustainability	➤ We believe it is essential to have the ability to promote and oversee sustainability management that balances the resolution of social issues with the sustainable enhancement of corporate value.
Matters related to revenue growth	Sales/Marketing	➤ To strengthen earning power through a shift to high value-added businesses and the development of new businesses, we believe it is essential to have the ability to leverage sales and marketing capabilities to build and promote business strategies such as the evolution and multilayering of business models, as well as the ability to oversee these activities.
Matters related to strengthening the management foundation	IT/DX	➤ To realize the creation and enhancement of customer value through the use of data and digital technologies, we believe it is essential to have the ability to apply advanced knowledge of IT and digital transformation (DX) to management and its oversight.
	Finance/Accounting	➤ We believe that advanced expertise in accounting is essential to support the Company’s globally developed business through effective management and oversight. Furthermore, to achieve sustainable growth, we believe it is essential to have the ability to promote and oversee a financial strategy that balances the three key elements of “financial soundness,” “return on capital,” and “growth potential.”
	Risk management/Legal affairs	➤ We believe it is essential to have the ability to build and promote a risk management framework that supports growth strategies through enhanced risk control, as well as the ability to oversee these activities. Furthermore, we believe that advanced expertise in legal affairs is essential to identify key risks in business activities from a legal perspective and to apply that insight to management and its oversight.
	Human resource management	➤ We believe it is essential to have the ability to build and promote a human resources strategy that secures, develops, and utilizes talent in order to fulfill a “talent portfolio” that supports management strategy and to create a workplace that is both comfortable and motivating. This includes the ability to oversee such activities.

## Overview of Financial Results

- Net income attributable to owners of parent increased by ¥11.3 billion (up 9.1%) year on year to ¥135.1 billion, mainly due to the strong performance of the Aviation and Logistics segments and a large gain on sale of securities in the Environment & Energy segment, despite an increase in credit costs in the Global Business and Environment & Energy segments.  
This amount exceeded the initial forecast of ¥135.0 billion, hitting a record high for three consecutive years.

## Introduction to the Company's Businesses

- The Group's business portfolio is built on a solid foundation consisting of Customer Solutions and Global Business, both of which are supported by a stable and robust customer and business base that enables consistent profit generation.
- Built upon that foundation are the five specialized business pillars of Environment & Energy, Aviation, Logistics, Real Estate, and Mobility, which, while volatility\* is relatively high due to their exposure to market conditions, also offer correspondingly higher returns. Because the timing and magnitude of market fluctuations in these five specialized businesses do not necessarily align, they tend to offset each other's volatility. As a result, the Group as a whole maintains a portfolio with low volatility and stable profitability. This is a unique strength of our Group that cannot be replicated by other companies.
- Please refer to page 27 for the profit and asset balance of each business segment.

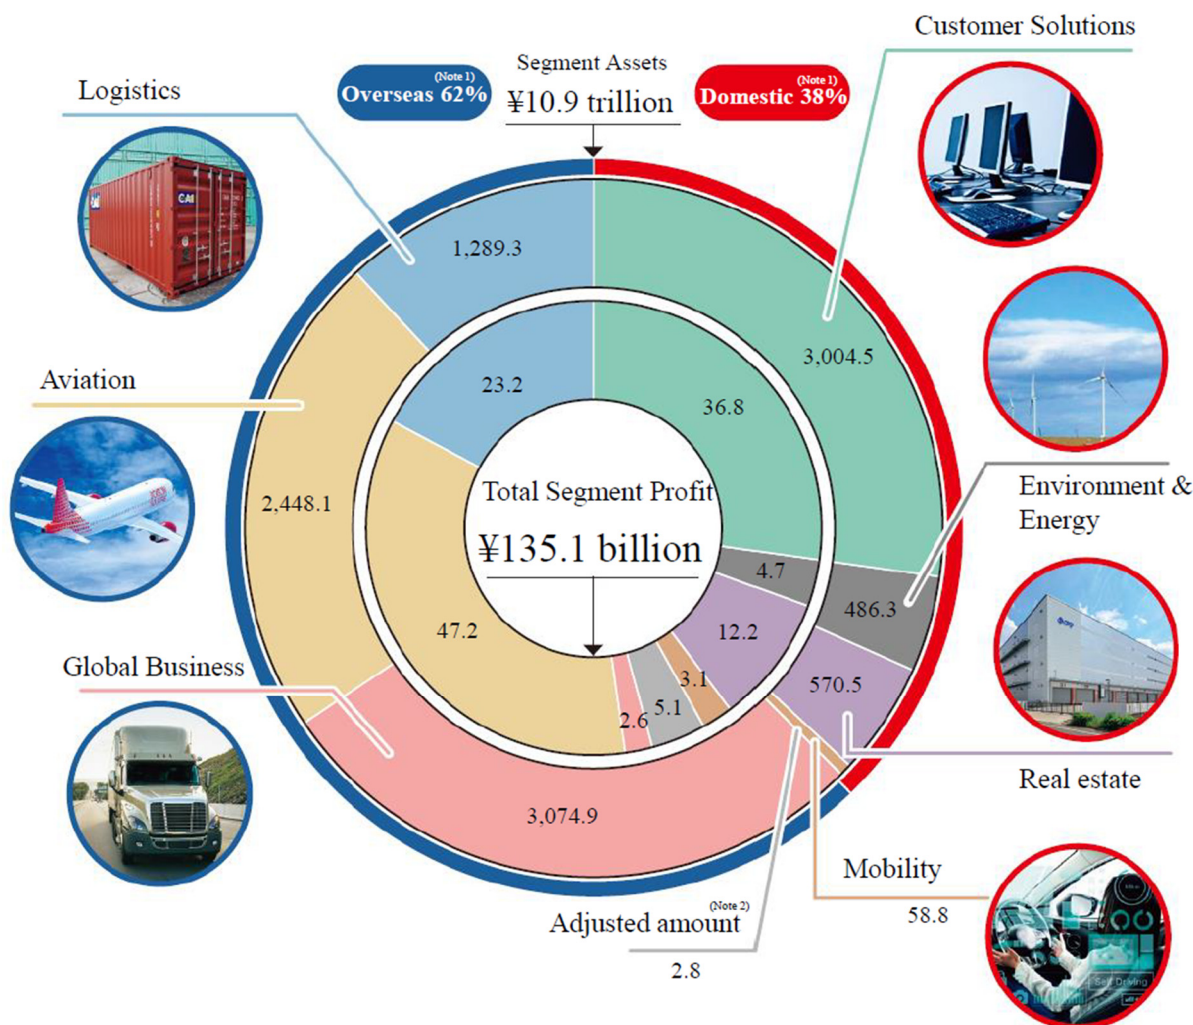

\* The degree or rate of fluctuation in returns or prices.

Environment & Energy	Renewable energy business
Aviation	Aircraft leasing business and aircraft engine leasing business
Logistics	Marine container leasing business and railcar leasing business
Real Estate	Real estate finance business, real estate investment business, and real estate asset management business
Mobility	Mobility related business focusing mainly on auto leasing business and supplementary services

## 2) Operating results by reportable segment

The operating results by reportable segment and the main factors behind increases or decreases are as follows.

A description of the business in each segment is provided in “Principal business” section of the Other Matters Subject to the Electronic Provision Measures (Matters Omitted from Documents Delivered to Shareholders).

	Main factors for changes in segment profit
Customer Solutions	Segment profit decreased by ¥1.2 billion, or 3.3% year on year, to ¥36.8 billion mainly due to negative effects of deconsolidation of consolidated subsidiaries of DFL Lease Co., Ltd., Shutoken Leasing Co., Ltd. and Sekisui Leasing Co., Ltd., and an increase in credit costs despite recording of gain on sales of shares of subsidiaries and affiliates.
Global Business	<p>Segment profit decreased by ¥13.9 billion, or 83.9% year on year, to ¥2.6 billion, mainly due to an increase in credit costs in line with the market downturn of the transportation sector in the Americas and an absence of positive effects of fiscal period adjustment* associated with the reorganization of subsidiaries in the Americas in the previous fiscal year.</p> <p>* Effective April 1, 2023, we executed the business integration of three subsidiaries in the Americas having a different fiscal year-end. While the surviving company's fiscal year-end is March 31, the two merged companies' fiscal year-end was December 31. Accordingly, the consolidated financial statements for the fiscal year ended March 31, 2024 included the results of the surviving company from April 1, 2023 to March 31, 2024 as well as the results of the two merged companies from January 1, 2023 to March 31, 2023.</p>
Environment & Energy	Segment profit decreased by ¥2.5 billion, or 35.0% year on year, to ¥4.7 billion mainly due to recording of large credit costs on a renewable energy project in Japan and additional impairment losses on a solar power generation project in Japan for which impairment losses were recorded in the previous fiscal year despite recording of gain on sale of investment securities related to the sale of an overseas infrastructure project.
Aviation	Segment profit increased by ¥19.8 billion, or 72.7% year on year, to ¥47.2 billion mainly thanks to increases in leasing revenue and gain on sales as well as the positive effects of fiscal period adjustment associated with the change of fiscal year-end of JSA International Holdings, L.P. and its subsidiaries.
Logistics	Segment profit increased by ¥5.3 billion, or 30.2% year on year, to ¥23.2 billion mainly thanks to increases in leasing revenue and gain on sales in the marine container leasing business and the railcar leasing business despite a decrease in gain on sales of vessels.

2) The Company's management strategy in the medium to long term and issues to be addressed

(i) Business environment

In recent years, there have been drastic changes in the external environment and there is an increasing need to recognize megatrends, or the trends influencing domestic and international economies over the medium to long term, such as geopolitics and the economy, climate change, expansion and evolution of technology, and demographics.

In these changes to the external environment, the roles required of the Group are changing to better resolve social issues through business investment and operation, in addition to conventional leasing and finance. Further, business models at an industry level are expected to change rapidly at a speed which has exceeded all expectations. In such circumstances that all companies are to adapt to the environmental changes, the prominence of the Group, holding various asset-related functions and offering flexible services which are not limited to financial functions, will increase further.

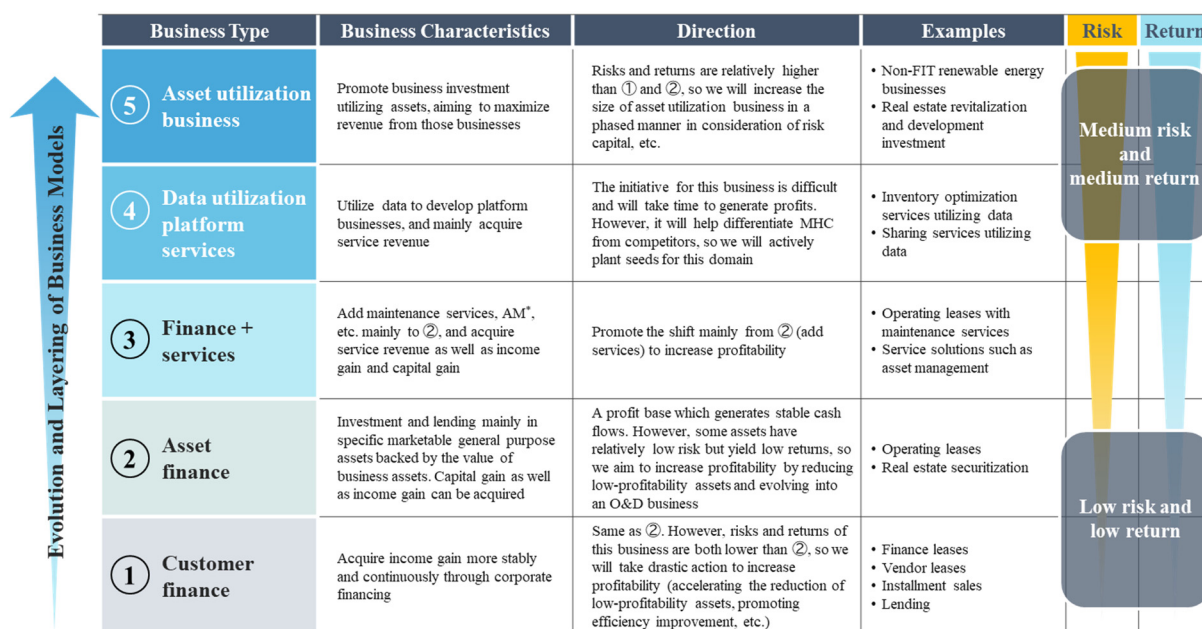

(ii) The Direction the Group Should Take and the MTMP

The Group has established Our 10-year Vision, "Together we innovate, challenge and explore the frontiers of the future." We will work toward achieving this vision through a series of three Medium-term Management Plans ("hop," "step," and "jump.") The Medium-term Management Plan covering the three-year period from FY2023 (fiscal year ended March 31, 2024; the "2025 MTMP") is positioned as the "hop" plan, and we are engaging in initiatives under the key themes of "Sowing seeds" and "Gaining a solid foothold" to drive a leap forward into the "step" and "jump" phases.

(iii) Business Strategies

Evolution and Layering of Business Models

The Group's businesses are classified into the five types below and is proceeding with the evolution and layering of business models to achieve business portfolio transformation.

Business Type	Business Characteristics	Direction	Examples	Risk	Return
⑤ Asset utilization business	Promote business investment utilizing assets, aiming to maximize revenue from those businesses	Risks and returns are relatively higher than ① and ②, so we will increase the size of asset utilization business in a phased manner in consideration of risk capital, etc.	<ul style="list-style-type: none"> <li>Non-FIT renewable energy businesses</li> <li>Real estate revitalization and development investment</li> </ul>	Medium risk and medium return	
④ Data utilization platform services	Utilize data to develop platform businesses, and mainly acquire service revenue	The initiative for this business is difficult and will take time to generate profits. However, it will help differentiate MHC from competitors, so we will actively plant seeds for this domain	<ul style="list-style-type: none"> <li>Inventory optimization services utilizing data</li> <li>Sharing services utilizing data</li> </ul>		
③ Finance + services	Add maintenance services, AM*, etc. mainly to ②, and acquire service revenue as well as income gain and capital gain	Promote the shift mainly from ② (add services) to increase profitability	<ul style="list-style-type: none"> <li>Operating leases with maintenance services</li> <li>Service solutions such as asset management</li> </ul>	Low risk and low return	
② Asset finance	Investment and lending mainly in specific marketable general purpose assets backed by the value of business assets. Capital gain as well as income gain can be acquired	A profit base which generates stable cash flows. However, some assets have relatively low risk but yield low returns, so we aim to increase profitability by reducing low-profitability assets and evolving into an O&D business	<ul style="list-style-type: none"> <li>Operating leases</li> <li>Real estate securitization</li> </ul>		
① Customer finance	Acquire income gain more stably and continuously through corporate financing	Same as ②. However, risks and returns of this business are both lower than ②, so we will take drastic action to increase profitability (accelerating the reduction of low-profitability assets, promoting efficiency improvement, etc.)	<ul style="list-style-type: none"> <li>Finance leases</li> <li>Vendor leases</li> <li>Installment sales</li> <li>Lending</li> </ul>		

\*AM: Asset Management

Premise for business strategies

We will achieve profit growth by transforming our business portfolio and the quality of our assets in the medium- to long-term through the evolution and layering of business models. To this end, we will actively invest cash flows from a medium- to long-term perspective after paying dividends.

For the purpose of supporting this effort, we will achieve medium- to long-term return on capital and financial soundness by optimizing our balance sheet, and then maximize our corporate value.

Shareholders in June of every year.

- As stock compensation, points are granted at the end of every fiscal year (the end of March) corresponding to the position and number of months in office of the relevant person, in principle. The aggregate number of the said points of three years is multiplied by the performance-linked factor to calculate share conversion points, based on which the Company Shares, etc. are provided in July of the fiscal year following the final fiscal year of the Medium-term Management Plan period (three years).
- Non-monetary remuneration for the provision of company housing shall be paid monthly in addition to basic remuneration.

Type of Remuneration	Payment timing	Subject Period of Payment
Basic remuneration	A predetermined date every month	Every Fiscal Year
Bonus	After an annual General Meeting of Shareholders	Previous fiscal year (April to next March)
Stock compensation		Medium-term Management Plan period (three years)
(a) Points*	End of every fiscal year	The period of service during each fiscal year
(b) Company shares, etc.	July following the end of the Medium-term Management Plan	Cumulative period of service during the Medium-term Management Plan period
Non-monetary remuneration related to the provision of company housing	A predetermined date every month	Every Fiscal Year

\* The (b) Company's shares, etc. are provided based on the share conversion points calculated by multiplying the number of (a) points aggregated during the Medium-term Management Plan period by the performance-linked factor.

(iii) Method of determining remuneration, etc., outline of the Committee's procedures, and description of its activities

- The details of remuneration, etc. and the policy for determining remuneration, etc. for Directors (excluding Directors who are Audit & Supervisory Committee Member) are resolved at meetings of the Board of Directors after deliberation by the Compensation Committee, which is comprised of a majority of Independent Outside Directors. The Compensation Committee also deliberates annually on the appropriateness of the level and composition of remuneration based on remuneration data and other information provided by external professional organizations.
- The members and chairperson of the Compensation Committee are selected by the Board of Directors, and the Committee adopts resolutions by a majority of the members present. In addition, the Company's rules stipulate that the Board of Directors shall respect the resolutions of the Committee.
- The Company believes it is helpful that the specific amount of basic remuneration and bonuses for Directors (excluding Directors who are Audit & Supervisory Committee Members), as well as non-monetary remuneration for the provision of company housing, is determined flexibly based on certain standards by someone who is familiar with individual operations and the Company's situation. The decision is thus entrusted to the President & CEO (Taiju Hisai), who is the Representative Director, within the upper limit set forth by resolution of the General Meeting of Shareholders, based on the policy resolved by the Board of Directors and Compensation Committee. The Company will take measures to ensure that the authority of the President & CEO is appropriately exercised as follows.

Regarding stock compensation, Company shares, etc. corresponding to share conversion points calculated based on the regulations for share delivery, which were stipulated by the resolution of the Board of Directors, shall be provided.

[Measures to ensure that the delegated authority is properly exercised]

- Basic remuneration is determined based on certain pre-established standards (remuneration table) that are deliberated by the Compensation Committee.
- The following shall apply to the portion of the bonus linked to the company-wide performance:
  - ✓ KPIs are established according to numerical targets discussed at the Board of Directors.
  - ✓ The amount to be paid is determined according to the achievement rate of the KPI based on a predetermined payment coefficient deliberated by the Compensation Committee.
  - ✓ The results of the company-wide performance evaluation and the amount to be paid are subsequently reported to the Compensation Committee for verification. In addition, the following shall apply to the portion of the bonus linked to operational responsibilities:
    - ✓ After deliberations in advance by the Compensation Committee, an evaluation sheet (an evaluation sheet providing details on predetermined targets, weighting of individual targets, and evaluation criteria) is finalized.
    - ✓ After the individual duties are evaluated based on the evaluation sheet, the results and amount to be paid are subsequently reported to the Compensation Committee for verification.
- For stock compensation, points corresponding to the position and number of months in office of the relevant person at the end of every fiscal year are granted based on the prescribed standards as per the regulations for share delivery, which are resolved by the Board of Directors. In principle, the performance-linked factor, which is determined upon the completion of the Medium-term Management Plan every three years shall also be as per the regulations for share delivery.
- Non-monetary remuneration related to the provision of company housing:
  - ✓ The company housing to be provided shall be a general standard property, and the maximum rent shall be established in advance based on position and geographical area.
  - ✓ The Company housing rent calculated based on the predetermined percentage (if the maximum rent is exceeded, the full amount of the excess amount is added) shall be collected from the Director as their own expenses.  
(There are currently no eligible officers who are provided with company housing.)

- The amounts of remuneration, etc. for Directors have been resolved at the General Meeting of Shareholders as follows.

c. Matters concerning calculation of performance-based compensation

The amount of performance-based compensation is calculated using the designated formula based on the achievement rate of each KPI.

[Bonus]

- The KPIs for evaluating company-wide performance used for bonuses for Executive Directors are i) net income attributable to owners of the parent (weighted at 70%), ii) ROA (weighted at 15%), and iii) ROE (weighted at 15%).
- The targets and results for the fiscal year ended March 31, 2025 are as follows.

ROE	8.0%	7.8%	97.5%	15%

- For the portion linked to operational responsibilities of Executive Directors other than the Representative Director, the President & CEO will use a standard evaluation sheet to perform quantitative and qualitative evaluations from the standpoint of performance and contribution. Performance targets are set based on the environment of the business in charge, the previous year's performance, and other factors according to the responsibilities of each Director, and evaluations are performed taking into account the respective performance and contribution.

- d. Reasons for the Board of Directors' determination that the content of individual remuneration of Directors (excluding Directors who are Audit & Supervisory Committee Members) for the fiscal year under review is appropriate
  - The specific amount of basic remuneration and bonuses, as well as non-monetary remuneration for the provision of company housing are entrusted to the President & CEO within the upper limit set forth by resolution of the General Meeting of Shareholders. In addition, as the Company has taken measures as described in [Measures to ensure that the delegated authority is properly exercised] at b. (iii) above, there is a system for the Compensation Committee and the Audit & Supervisory Committee to confirm that individual remuneration, etc. for Directors is determined by procedures that are objective and transparent, and that the content is in line with the policy established by the Company. The Board of Directors has determined that the content of individual remuneration, etc. for each Director for the fiscal year under review is in line with the remuneration policy.
